

# Fish Oil Market To Reach USD 3.97 Billion by 2032, at a CAGR of 5.9% from 2025 to 2032

*Fish Oil revenue is expected to grow at a CAGR of 5.9% from 2025 to 2032, reaching nearly USD 3.97 Billion by 2032.*

WILMINGTON, DE, UNITED STATES, August 5, 2025 /EINPresswire.com/ -- Stellar Market Research examines the growth rate of the [Fish Oil Market](#) during the forecasted period 2025-2032

The Fish Oil Market is projected to grow at a CAGR of approximately 5.9% over the forecast period. The Fish Oil Market was valued at USD 2.37 billion in 2024 and is expected to reach USD 3.54 billion by 2032. The fish oil trade grows as more people care about health, stopping long-term illness, the need in fish farming, drug use, the rise of health foods, the older population, and new ways of saving the earth, like how it's made and where it comes from.

Fish Oil Market

“

Fish oil is more than a supplement; it's a vital link between ocean sustainability, human health, and global nutrition, driving innovation across wellness, aquaculture, and pharmaceutical industries.”

Navneet Kaur

## Fish Oil Market Overview

The fish oil market grows due to the increasing need in fish farm feed, people's health, and medicines. Europe has the most part, but Asia-Pacific is rising fast. An oil from anchovy and salmon is used a lot. More people now want clean and high-quality oils. Big issues are too much fishing, keeping nature safe, and high costs to make it. Big names are Omega Protein, BASF, and ADM. New ways to get oil, make it better, and track it are making a big impact on where the fish oil world is headed.

## Fish Oil Market Dynamics

### Rising Health Awareness and Demand for Omega-3 Fatty Acids

Omega-3 fats in fish oil are more and more liked for their help with heart, mind, joint, and head health. More people know this, so they want more supplements, food with extra good stuff, and earth-friendly sources like algae oil. New studies show omega-3s can slow old age and cut down rage. Changes in how to give these and keeping to earth-friendly ways are making the market big as health care goes up around the world.

### Pharmaceutical Applications and Advancements

Fish oil pills like Vascepa, made to high drug standards, are key for heart health. They cut down on fats and swelling in the body. Backed by the FDA and many studies, they help stop heart attacks. New types and uses, like for Alzheimer's, are being made. More people know about this, and more studies on it are making the omega-3 market grow, helping more people.

### Technological Advances in Extraction and Purification

Tech like high force CO<sub>2</sub> removal, small bit distillation, and sound waves helps make fish oil purer, with a stronger mix, and better taste by cutting down on dirt and air damage. These tools allow for top-tier omega-3 production in an eco-friendly way, like using algae for omega-3. All of this lifts the product's quality, opens new market chances, and fits with green aims.

### Restrain

### Competition from Plant-Based Omega-3 Alternatives

Plant oils from algae, flaxseed, and chia are getting more love these days. People pick them for being kind to the planet and for not smelling bad, unlike fish oil. Rules help, and the market is growing, making more people use them. Yet, they cost more to make, not many know about them, and it's hard to get them from place to place. Even with these issues, plant oils are now big players in the omega-3 game.

### Innovations and Developments

Technological innovation is a key factor propelling the Fish Oil Market forward. Notable advancements include:

Smart aquaculture uses small tech, like IoT sensors, smart cameras, and AI, to set the right amounts for fish food and keep fish health in check, making feed use better and boosting fish oil production.

Using parts left from fish shaping with enzyme methods ups the outcome and cuts down trash. Closed systems and biofloc farming help keep things going and make sure there is enough fish supply later on.

## Fish Oil Market Segmentation

### By Process

By Process, the Fish Oil Market is further segmented into Crude Fish Oil, Refined Fish Oil, and Modified Fish Oil. Refined fish oil dominates the market with high clean levels, big use in food and health, and 40% part. Changed fish oil picks up quickly, aiming at extras and strong foods. Raw fish oil is the most commonly used for animal food. New steps in taking out, packing, and keeping nature safe push growth in all parts.

### Fish Oil Market Regional Analysis

Europe: Europe is at the top of the fish oil market because of its high need for omega-3, fine refining, tough rules, and a well-established fish farming field. New steps in being green, using algae as an option, and tracking with blockchain also push its lead. Big names in the field and new growth in how much they can make help this, too.

North America: North America holds the spot as the second-biggest fish oil market. This is due to the high need for omega-3 pills, top-level health care set-up, and rules that help. New ways to take out oil and get it from places that will not run out, plus more goods for those who eat no meat, push up growth in pills, health care, and pet food.

Asia-Pacific: Asia-Pacific is third in the fish oil market. This is because of big fish farms, more people caring about health, growing use of omega-3 boosts, good ways to get oil, and buys from Latin America and Europe, helping its big growth.

### Recent Developments:

GC Rieber VivoMega (Norway) set up a new omega-3 making facility in June 2024, all run by clean energy. This growth plan is to make twice as much fish oil omega-3s and plant-based oils, meeting the rising need for omega-3 add-ons.

Epax (Norway), part of Pelagia, started selling a wide-range oil in March 2024 that mixes Omega-3, -9, and -11 fats, aimed at uses in skin health add-ons.

## Fish Oil Market Competitive Landscape

The global and regional players in the Fish Oil Market concentrate on developing and enhancing their capabilities, resulting in fierce competition. Notable players include:

Omega Protein Corporation

FF Skagen A/S

Pesquera Diamante S.A.

Copeinca AS

Marvesa Holding N.V.

Pesquera Exalmar

Corpesca S.A.

Colpex International

FMC Corporation

TripleNine Group A/S
