

# E4 Supports Glenview Park District's Clean Energy Goals Through Community Solar Subscription

---

CHICAGO, IL, UNITED STATES, August 5, 2025 /EINPresswire.com/ -- E4, a leading energy and sustainability consulting firm, has partnered with the Glenview Park District to enroll the organization in an Illinois Community Solar program, advancing its sustainability goals while lowering operational energy costs across the district's diverse network of properties.

As one of the largest park districts in the state of Illinois, the Glenview Park District oversees more than 860 acres of land, including nature preserves, educational centers, athletic facilities, and cultural spaces. By joining Community Solar, the district is now supporting the development of renewable energy in Illinois while benefiting from cost savings through bill credits tied to solar energy production.

Community Solar provides a streamlined solution for businesses, municipalities, public agencies, and other organizations to participate in the clean energy transition without the need for on-site infrastructure. By subscribing to energy generated from off-site solar projects, participants receive utility bill credits tied to their share of production – lowering costs while contributing to the growth of renewable energy across Illinois.

Through this collaboration, E4 worked closely with the Glenview Park District to assess its energy profile, identify an appropriate subscription opportunity, and navigate the contracting process. The result is a cost-effective, no-risk energy solution that aligns with the district's environmental values and long-term operational goals.

"As stewards of both natural spaces and public resources, we're always looking for solutions that deliver environmental and operational value," said Michael McCarty, Glenview Park District's Executive Director. "Community Solar allows us to reduce energy costs across our facilities while reinforcing our long-standing commitment to sustainability, education, and responsible land management. E4 made the process seamless, helping us make progress without added complexity."

"The Glenview Park District brings a unique level of care to the spaces and services it provides, and that mindset carries naturally into sustainability," said Jonathan Siegle, Founder and Managing Member of E4. "We're proud to support their clean energy efforts through Community Solar – helping them lower costs, reduce emissions, and stay focused on their mission without

added operational burden.”

With this enrollment, the Glenview Park District joins a growing number of institutions across Illinois that E4 has supported in making the transition to Community Solar. From healthcare systems to municipalities and now public park districts, E4 continues to help organizations adopt clean energy solutions that reduce costs, simplify energy management, and contribute to a more sustainable and resilient future for their communities.

#### About E4

E4 is a Chicago-based energy and sustainability consulting firm dedicated to helping businesses and municipalities achieve their renewable energy goals. The firm specializes in strategic energy procurement, Community Solar enrollment, and sustainability planning, delivering solutions that reduce costs and enhance environmental performance.
