While dermal fillers can boost the appearance of one’s skin on an immediate basis, it is still important to take care of one’s skin and protect it in order to lessen the effects of aging. “Once Ekata Rushi PA-C gets you started on your custom anti-aging regimen you will begin to notice the benefits of injectables and Medical grade Skin products, you need to start looking at preventive skincare,” says Ekata. “Granted, you’re still going to age, so you can’t stop all wrinkles from forming. However, you can certainly work to lessen your risk of deep wrinkles and other signs of aging. The best way to prevent wrinkles is to minimize sun exposure and wear sunscreen daily.
