

Thermahood TH120 M – New Fire-Rated Solution for Recessed Lights, Downlights & Speakers

UNITED KINGDOM, August 7, 2025

/EINPresswire.com/ -- Thermahood is proud to announce that its [TH120 M](#) — the robust metal variant of its popular downlight cover — can now be used to achieve 30- and 60-minute fire-rating.

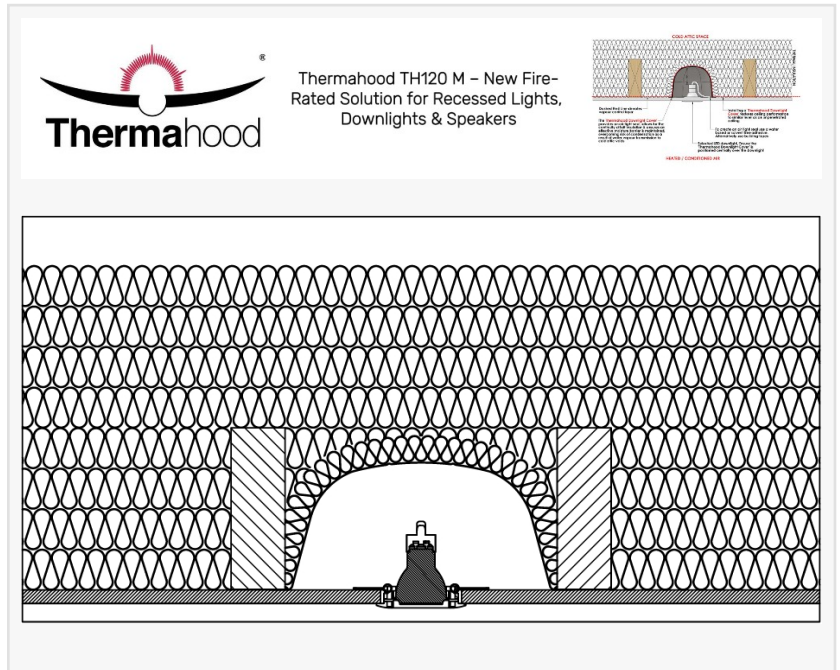

Designed for use with recessed downlights, downlights and ceiling speakers, the TH120 M provides an effective solution for protecting fixtures while maintaining ceiling integrity and reducing air leakage.

TH120 M can be used to achieve fire ratings when installed according to approved methods. This makes it an ideal choice for developers, contractors, and self-builders looking to meet building control requirements without compromising on performance or installation efficiency.

In addition to contributing to fire safety, the TH120 M supports improved airtightness and energy efficiency, helping reduce heat loss and preventing cold draughts — key factors in modern low-carbon construction and retrofit projects.

Key Benefits:

- Suitable for recessed downlights, downlights and ceiling speakers
- Supports improved airtightness and energy efficiency
- Reduces heat loss and draughts
- Strong, durable metal construction
- Helps meet Part L and Part B building regulations
- BS EN 1364-2
- EN 13501-2

-E30 (30min) and E60 (60min)

About Thermahood

Thermahood provides innovative, easy-to-install solutions that ensure airtightness, improve energy efficiency, and protect fittings in ceilings. With the addition of fire-rated certification for the TH120 M, Thermahood continues to set the standard for safe and sustainable building products.
