

GPRS Acquires Accu-Scan

GPRS acquires Accu-Scan to expand Northeast presence and enhance subsurface detection services; marks GPRS's 12th acquisition.

MAUMEE, OH, UNITED STATES, August 7, 2025 /EINPresswire.com/ -- GPRS has acquired [Accu-Scan](#) GPR Corporation, a provider of concrete scanning and [utility locating](#) services based in Middle Village, New York. Accu-Scan is known

for delivering the highest quality subsurface detection services to the engineering and construction industries, using state-of-the-art equipment, technology, and processes. This marks the twelfth acquisition for Maumee-based GPRS.

The New-York-Based Firm Marks GPRS' 12th Acquisition

“

This new partnership will allow us to provide a broader set of products and services, so we can better serve our clients and further accelerate our growth.”

*Brian Thomsen, President of
Accu-Scan*

“GPRS is the ideal new owner for Accu-Scan,” said Brian Thomsen, President of Accu-Scan. “GPRS’ scale and reputation make it a perfect home for the Accu-Scan team. We are excited for this new partnership because it will allow us to provide a broader set of products and services, so we can better serve our clients and further accelerate our growth.”

Founded in 2012, Accu-Scan specializes in utility locating and concrete scanning, and has focused on innovation, quality, sustainability, and accessibility for AEC, and

related industries,

Accu-Scan represents a highly complementary acquisition that enhances GPRS’ existing capabilities and market position in the Northeast. “Accu-Scan is a tremendous fit for GPRS,” said Matt Aston, CEO of GPRS. “We share a similar vision, culture, and mission for serving our clients with the highest quality of service and support. We are excited about the partnership with Accu-Scan and believe that the combination of the two organizations will result in attractive growth opportunities.”

About GPRS

GPRS, headquartered in Maumee, Ohio, provides private utility locating, concrete scanning, video pipe inspection, leak detection, reality capture, laser scanning, and mapping and modeling services to utilities, contractors, architecture and engineering firms, and environmental consultants in every major market in the United States.
