requirements with NIST 800-53 controls, offering unparalleled precision and efficiency. This upgrade introduces a streamlined user interface, improved mapping accuracy, and dynamic updates to keep pace with evolving compliance standards, empowering organizations to achieve certification with ease.

Key highlights of the enhanced CMMC-NIST 800-53 automapping feature include:

- Automated Mapping: Seamlessly correlates CMMC practices with NIST 800-53 controls, reducing manual effort and errors.
- Time Savings: Cuts compliance preparation time by up to 40%, enabling faster readiness for DoD certifications.
- Scalable and Accessible: Supports businesses of all sizes, from startups to enterprises, in meeting stringent regulatory requirements.

“The enhanced CMMC-NIST 800-53 automapping feature reflects Continuum GRC’s commitment

to simplifying compliance without compromising accuracy,” said Michael Peters, CEO at Continuum GRC. “By bridging CMMC and NIST 800-53, we’re enabling our clients to navigate complex cybersecurity requirements with confidence.”

The CMMC-NIST 800-53 automapping feature is available now within Continuum GRC’s IT Audit Machine (ITAM) platform. For more information or to request a demo, visit www.continuumgrc.com.
