

# Global Wireless Electric Vehicle Charging Market Valued at \$466 Million in 2023, Forecast to Hit \$12.4 Billion by 2033

WILMINGTON, NEW CASTLE, DE, UNITED STATES, August 7, 2025 /EINPresswire.com/ -- Allied Market Research published a report, titled, [Wireless Electric Vehicle Charging Market](#) Size, Share, Competitive Landscape and Trend Analysis Report, by Vehicle Type (Passenger Cars, Commercial Vehicles), by Distribution Channel (OEMS, Aftermarket), by Installation (Home, Commercial), by Power Source (Below 11 KW, 11-50 KW, Above 50 KW): Global Opportunity Analysis and Industry Forecast, 2023 - 2033.

**Market Size :** The global wireless electric vehicle charging market size was valued at USD 466 million in 2023, and is projected to reach USD 12.4 billion by 2033, growing at a CAGR of 38.6% from 2024 to 2033.

## Prime determinants of growth

The global wireless electric vehicle charging market is driven by factors such as increase in the adoption of electric vehicles, advancements in charging technologies, rise in investments in smart infrastructure, and surge in emphasis on reducing carbon emissions through sustainable mobility solutions. However, high capital costs and stringent regulations and guidelines may hamper the market growth.

The passenger cars segment to maintain its leadership status throughout the forecast period.

By vehicle type, the passenger cars segment held the highest market share in 2023, accounting for nearly three-fifths of the global wireless electric vehicle charging market revenue and is estimated to maintain its leadership status throughout the forecast period.

This dominance is driven by rise in the adoption of electric passenger cars worldwide, supported by government subsidies, tax incentives, and growth in environmental awareness among consumers. The increasing integration of wireless charging systems in premium and luxury car models further accelerates growth in this segment. Moreover, advancements in wireless charging technology, such as improved efficiency and reduced charging time, coupled with the demand for hassle-free and user-friendly charging solutions, are key factors propelling the passenger car segment's leadership in the market.

The aftermarket segment to maintain its leadership status throughout the forecast period

By distribution channel, the aftermarket segment held the highest market share in 2023, accounting for nearly three-fifths of the global wireless electric vehicle charging market and is estimated to maintain its leadership status throughout the forecast period.

This segment's dominance is attributed to the increasing demand for retrofitting wireless charging systems in existing electric vehicles and the growing availability of aftermarket solutions tailored to diverse consumer needs. In addition, rise in focus on cost-effective alternatives and expansion of independent service providers offering advanced wireless charging kits have further boosted the segment's growth.

The home segment to maintain its leadership status throughout the forecast period

By installation, the home segment segment held the highest market share in 2023, accounting for three-fifths of the global wireless electric vehicle charging market and is estimated to maintain its leadership status throughout the forecast period. This dominance is driven by the growing preference for convenient and private charging solutions, allowing EV owners to charge their vehicles effortlessly at home. The increasing adoption of residential wireless charging systems, supported by advancements in compact and user-friendly designs, has further contributed to this growth. In addition, government incentives and rebates for home EV charging installations, coupled with rise in the number of single-family households adopting electric vehicles, are key factors reinforcing the home segment's market leadership.

Leading Market Players: –

Wipowerone

Witricity  
Evatran  
Dashdynamic  
HEVO,  
Induct EV Inc.  
Continental AG  
Toyota Motor Corporation  
Robert Bosch GmbH  
Electreon
