

Ensoftek's DrCloudEHR launches Game-Changing AI-Powered Group Scribing, a First for Behavioral Health EHRs

DrCloudEHR's new Ai Group Scribing feature directly addresses this, transforming the process with advanced artificial intelligence that provides:

OREGON, OR, UNITED STATES, August 7, 2025 /EINPresswire.com/ -- Ensoftek's [DrCloudEHR](#), the dedicated [Electronic Health Record](#) (EHR) system for behavioral health, is excited to announce the launch of its innovative AI-powered Group Scribing feature. This groundbreaking technology is a first in the behavioral health and human services EHR landscape, offering real-time, intelligent documentation for multi-participant therapy sessions and promising to dramatically reduce documentation time by up to 80%.

Group Therapy is a common and effective method in health and human services, but accurate and timely documentation has been a major challenge. DrCloudEHR's new [Ai Group Scribing](#) feature directly addresses this, transforming the process with advanced artificial intelligence that provides:

Speaker Diarization: Ai Speaker Tagging - Automatically identifies and separates up to 15 participants, offering clear, real-time tracking of who spoke when.

Sentiment Analysis(Pro): Intelligently analyzes emotional tone and sentiment throughout the session, providing deeper clinical insights into group dynamics.

Per-Speaker Summaries: Generates concise, individual summaries for each participant, highlighting their key contributions and making progress note generation a breeze.

Interaction Timelines (Pro): Creates a detailed, timestamped record of group interactions, offering a clear visual of participation patterns and session flow.

Clinical Keyword Detection (Pro): Automatically flags important clinical terms, therapeutic concepts, and potential risk factors for easy review.

Audit-Ready Transcripts: Produces comprehensive, HIPAA-compliant documentation, ensuring you're always prepared for regulatory audits.

"We have always been driven by the needs of behavioral health clinicians, and Group Ai-Scribing is a direct response to their challenges," said Ramesh Nagul, Chief Product Officer for Ensofttek, the company behind DrCloudEHR. "This isn't just a new feature; it's a fundamental shift in how group therapy documentation can be managed. We're giving clinicians back precious time, reducing the burden of administrative tasks, and ensuring unparalleled accuracy and compliance. It's about empowering them to focus more on patient care and less on paperwork. This is truly a monumental step forward for the behavioral health community."

DrCloudEHR has built its reputation on being an EHR truly designed for behavioral care, supporting the unique demands of Certified Community Behavioral Health Clinics (CCBHCs), IDD and Autism Programs, Substance Use Recovery Centers, and Integrated Primary & Behavioral Health Clinics. The new Group Scribing feature seamlessly integrates into DrCloudEHR's existing robust platform, which already includes built-in compliance with CCBHC standards, flexible workflows, real-time quality dashboards, and integrated billing.

Clinics adopting DrCloudEHR's Group Scribing can look forward to significant operational improvements, including higher quality documentation, a lighter administrative load, and enhanced readiness for audits. This innovation solidifies DrCloudEHR's leadership in behavioral health technology, driving better patient outcomes and more efficient clinical practices.

About DrCloudEHR:

DrCloudEHR is an AI-powered digital health solution built to redefine whole-person care and raise the standard of value-based healthcare delivery. By seamlessly integrating clinical, administrative, and financial data, DrCloudEHR delivers actionable intelligence that enhances care coordination, streamlines operations, and enables efficient, connected care networks.

DrCloudEHR supports a wide spectrum of providers in health and human services, including public health agencies, mental health and addiction treatment centers, crisis response teams, developmental disability services, education-based health centers, veteran programs, and CCBHCs.
