

Micro Drone Market Growth Insights and Statistical Analysis to show Expanding Industry Size

Enhanced operational efficiency and surge in demand for improved surveillance drive the growth of the global micro drone market.

WILMINGTON, DE, UNITED STATES, August 8, 2025 /EINPresswire.com/ -- [Micro drone market size](#) generated \$6.71 billion in 2020, and is expected to reach \$28.91 billion in 2030, witnessing a CAGR of 17.2% from 2021 to 2030.

Increased operational efficiency and rise in demand for improved surveillance drive the growth of the global micro drone market. However, strict drone regulations and lack of skilled & trained personnel hinder the market growth. On the other hand, improvement in drone technologies and surge in defense spending globally present new opportunities in the coming years.

Increased operational efficiency and rise in demand for improved surveillance are expected to drive the micro drone market growth during the forecast period. However, strict drone regulations and lack of skilled & trained personnel are the factors that are expected to restrain the growth of the micro drone market during the forecast period. Moreover, improvement in drone technologies and rise in defense expenditure globally are the major factors that are expected to supplement the micro drone market.

Increase in R&D activities; technological developments by key players; rapid adoption of innovative technologies in making reliable, precise, and efficient micro drone technologies. Asia-Pacific is expected to grow at a significant rate during the forecast period, owing to rise in adoption of micro drone across different industry verticals along with huge defense spending by

big economies such as China, India, and Japan.
