What Is The Expected Cagr For The Antibiotic Free Meat Global Market Report 2025 Market Through 2025?

“

It will grow to \$261.15 billion in 2029 at a compound annual growth rate (CAGR) of 9.4%. ”

*The Business Research  
Company*

The market for meat free of antibiotics has been robustly growing in the past few years. The projection for growth is from \$167.39 billion in 2024 to \$182.39 billion in 2025, with a compound annual growth rate (CAGR) of 9.0%. This growth in the historic period is credited to factors such as increasing health concerns and consumer consciousness, adjustments in regulatory policies and guidelines on antibiotic usage, escalating worries about antibiotic immunity, change in consumer choices and requisition,

and advancements in techniques related to the production of livestock.

Strong expansion is projected in the antibiotic free meat market in the coming years, with the potential to reach a size of \$261.15 billion in 2029 at a 9.4% compound annual growth rate (CAGR). The growth anticipated within this forecast period can be credited to strict government regulations and policies, a rise in consumer preference for healthier choices, the growth of sustainable and ethical farming, initiatives within the retailer and food industry, and concerns over global health and food safety. Forward-looking trends projected within this forecast period encompass food supply chain collaborations, innovative health solutions for livestock, a transition towards sustainable agriculture, and a focus on animal welfare and ethical farming practices.

### What Are The Driving Factors Impacting The Antibiotic Free Meat Global Market Report 2025 Market?

The surge in the preference for health-conscious and superior-quality meat is predicted to stimulate the expansion of the antibiotic-free meat market. Health-conscious and superior-quality meat refers to a category of meat rich in nutritional content due to the incorporation of high-quality ingredients. For instance, Progressive Grocer, a US-based food retail industry magazine, reported in 2022 that since the onslaught of the COVID-19 pandemic, there has been an 11.5% rise in the premiumization of frozen meats, indicating a shift towards pricier, premium products. In addition, Redefine Meat Ltd., an Israel-based food company engaged in the food packaging business, revealed that the global meat consumption in 2020 stood at 340 metric tons and projected that this figure will exceed 460-570 metric tons by 2025. Consequently, this escalating demand for health-conscious and superior-quality meat is likely to fuel the development of the antibiotic-free meat market.

### Which Players Dominate The Antibiotic Free Meat Global Market Report 2025 Industry Landscape?

Major players in the Antibiotic Free Meat Global Market Report 2025 include:

- Cargill Incorporated
- Tyson Foods Inc.
- Hormel Foods Corporation
- Perdue Farms Incorporated
- Meyer Natural Angus LLC
- Saffron Road Foods Inc.
- MamaMancini's Holdings Corporation
- Ranch Foods Direct LLC
- White Oak Pastures Inc.
- American Foods Group LLC

### What Are The Future Trends Of The Antibiotic Free Meat Global Market Report 2025 Market?

The upward trend of investing in research and development tasks in the antibiotic-free meat sector is drawing quite the attention. Key businesses engaged in the antibiotic-free market are introducing advanced technologies and techniques to broaden their product offerings. For example, in June 2022, The Cheesecake Factory, an established chain of restaurants and distributor of cheesecakes in the USA, is extending its commitment to 'No Antibiotics Ever' meat to include beef and pork. This reflects the rising trend in the food sector towards procuring antibiotic-free meat. This strategic move depicts The Cheesecake Factory's steadfast commitment to assuring an excellent dining experience while keeping pace with the ever-changing consumer expectations.
