LAS VEGAS, NV, UNITED STATES, August 11, 2025 /EINPresswire.com/ -- Wise Business Plans, a nationally recognized leader in custom-written business

plans, has announced its boldest and most ambitious initiative to date: a commitment to help 10,000 entrepreneurs worldwide launch, fund, or expand their businesses by the end of 2026.

“

We aim to remove barriers and give every entrepreneur the tools, funding, and confidence to launch and grow successfully in today's global market.”

*Joseph Ferriolo, Director of  
Wise Business Plans*

This global effort comes at a time when entrepreneurship is undergoing one of the most dynamic shifts in history. Factors such as remote work opportunities, increased cross-border mobility, investor appetite for innovation, and the rise of digital-first business models have created fertile ground for new ventures. However, these opportunities come with increased complexity, from stricter funding requirements to navigating immigration laws and competitive markets.

For over 15 years, Wise Business Plans has served as a trusted partner for entrepreneurs across 400+ industries, delivering investor-ready, SBA-compliant, and [immigration visa business plans](#) that position clients for success. Now, the company is scaling its mission to a global level.

“We’re entering a golden era for entrepreneurs,” said Joseph Ferriolo, Director of Wise Business Plans and member of the Forbes Business Council. “From remote work to cross-border investment, there are more ways than ever to start a business, but also more complexity. Our mission is to remove those barriers and give every entrepreneur a fighting chance to succeed.”

## Meeting a Global Demand for Expertise

As part of its 10,000 Entrepreneur Initiative, Wise Business Plans will focus on four primary high-growth areas:

## Empowering the Next Generation of Entrepreneurs

The decision to launch a business often begins with an idea, but without a solid roadmap, even great ideas struggle to take off. According to recent data, over 80% of businesses fail within their first five years, often due to insufficient planning, insufficient funding, or inadequate market
