

# Terra Firma Energy Limited Launch Strategic Review into Evaluating Its Role in Supporting the UK's Evolving Energy System

*Terra Firma Energy Limited Launch Strategic Review into Evaluating Its Role in Supporting the UK's Evolving Energy System*

LONDON, UNITED KINGDOM, August 11, 2025 /EINPresswire.com/ -- Terra Firma Energy (TFE), a leading developer and operator of flexible generation assets in the UK, has today launched a strategic review to evaluate how best to expand and adapt its role in supporting the UK's evolving energy system.

Terra Firma Energy Launch Strategic Review

The review will focus on how TFE can accelerate its contribution to national decarbonisation goals while maintaining the resilience and responsiveness that the UK grid requires. With a proven portfolio of gas peaking plants already supporting grid stability, and new assets under construction, the company is now assessing opportunities to integrate new technologies and broaden its platform.

“

Our flexible generation assets already play a vital role in balancing intermittent renewables. This review will define how we continue to lead in providing reliability of supply.”

*Zach Dodds-Brown -  
Development Director Terra  
Firma Energy.*

“The UK energy market is changing rapidly, and so are the needs of the system,” said Zach Dodds-Brown, Development Director at Terra Firma Energy. “Our flexible generation assets already play a vital role in balancing intermittent renewables. This review will define how we continue to lead in reliability, while exploring new frontiers such as battery storage, low-carbon fuels, and digital

optimisation.”

TFE's portfolio includes several operational gas peaking sites and others currently under

construction, supported by long-term Capacity Market contracts. The review will examine both organic and inorganic opportunities, including:

- Deployment of utility-scale Battery Energy Storage Systems (BESS)
- Acquisition of complementary operating assets
- Integration of green hydrogen and carbon capture technologies
- Establishment of an in-house asset management platform to drive efficiency

“Flexible, fast-responding energy will remain critical as we shift to a renewable-powered grid,” added Zach. “TFE’s mission is to be the partner of choice for that transition — not just keeping the lights on, but doing it in a smarter, cleaner way.”

The findings of the strategic review will inform TFE’s next phase of investment and development, expected to be announced later this year.
