Greenhouse Heaters Market Hits to Reach \$3.2 bn by 2031, growing at a CAGR of 5.9% | Says AMR

WILMINGTON, DE, UNITED STATES, August 11, 2025 /EINPresswire.com/ -- The global [greenhouse heaters market](#) generated \$1.8 billion in 2021, and is

“

The increasing use of greenhouse heaters in organized shelters, coupled with favorable government measures, will create new prospects for the global greenhouse heaters market.

”

Allied Market Research

estimated to reach \$3.2 billion by 2031, witnessing a CAGR of 5.9% from 2022 to 2031. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chains, regional landscape, and competitive scenario. The report is a helpful source of information for leading market players, new entrants, investors, and stakeholders in devising strategies for the future and taking steps to strengthen their position in the market.

Greenhouse heaters are used to provide a comfortable

environment for plants and extend their life in cold climates. They are devices that maintain a constant temperature without releasing harmful substances to plants. Greenhouse heaters are used in greenhouses to maximize crop productivity or profit. A greenhouse heater is a heating system that can keep a greenhouse at a constant temperature. Some agricultural seedlings and flowering plants can survive and thrive in all four seasons, provided the greenhouse temperature is kept constant.
