

Oscillating Positive Expiratory Pressure Device Market Size, Growth Forecast 2035 | At a Thriving CAGR of 9.33%

Oscillating Positive Expiratory Pressure (OPEP) Device Market Poised for Robust Expansion Through 2035, Presenting Strategic Opportunities for B2B Stakeholders

NEW YORK, NY, UNITED STATES, August 11, 2025 /EINPresswire.com/ --

[Oscillating Positive Expiratory Pressure Device Market](#) is set for steady and

sustained growth, with the market estimated at USD 0.94 billion in 2024

and projected to reach USD 2.5 billion by 2035. This trajectory reflects a healthy compound annual growth rate (CAGR) of 9.33 percent, driven by increasing respiratory disease prevalence, technological advancements, and greater adoption in both clinical and home healthcare environments.

Industry Size & Market Scope

OPEP devices—comprising facemask, mouthpiece, and bottle configurations—are essential tools in respiratory therapy, designed to assist patients in mobilizing and clearing airway secretions. These devices are widely utilized in the management of chronic obstructive pulmonary disease (COPD), asthma, bronchiectasis, and cystic fibrosis. Their versatility and non-invasive nature have positioned them as indispensable solutions in both hospital and home-care settings.

Segmentation & Segment Growth By Product Type

Facemask OPEP Devices dominate the market, holding a 9.33 percent share in 2024 due to their comfort, ease of use, and suitability for a broad patient base.

Mouthpiece and Bottle OPEP Devices serve specific patient needs. Notably, bottle devices are witnessing faster adoption, supported by affordability, portability, and convenience.

By Application (Indication)

COPD remains the leading application segment, bolstered by its high global prevalence and strong clinical efficacy with OPEP therapy.

Asthma, bronchiectasis, and cystic fibrosis also drive substantial demand, particularly for long-term management of chronic respiratory conditions.

By End User

Hospitals account for the largest share of device procurement, serving both inpatient and outpatient needs.

Home Healthcare is the fastest-growing end user segment, reflecting a broader trend toward self-managed, outpatient respiratory care.

Regional Market Share & Growth Outlook

North America leads the market, capturing 40.5 percent of global revenue in 2024. This dominance is supported by advanced healthcare systems, high disease awareness, and favorable reimbursement policies.

Asia-Pacific is expected to register the fastest growth, driven by increasing respiratory disease incidence, an aging population, and expanding healthcare infrastructure.

Europe benefits from robust public health systems and patient education programs, while South America and the Middle East & Africa are seeing steady growth due to improved access to respiratory care.

Key Companies in the Oscillating Positive Expiratory Pressure (OPEP) Device Market Include

PARI Respiratory

Smiths Medical

Apex Medical Corporation

Trudell Medical International

Vitalograph

Philips
Omron Healthcare
Advanced Respiratory
Breas Medical
Clement Clarke International
Fisher and Paykel Healthcare
Timeter Medical

These companies remain at the forefront through product innovation, clinical research, and strong distribution capabilities. Their focus on patient-centric designs and strategic partnerships continues to strengthen their competitive positioning.

Emerging Trends & Recent Developments

Several trends are influencing market momentum:

Increasing awareness of respiratory health and the adoption of non-invasive treatment methods.

Rising demand for portable and easy-to-use devices, particularly for home-based care.

Accelerating adoption of cost-effective bottle-type OPEP devices.

Introduction of disposable models tailored for patients with cystic fibrosis, bronchiectasis, and COPD, enhancing hygiene and convenience.

Opportunities for B2B Stakeholders

Manufacturers have opportunities to innovate in portable, user-friendly OPEP designs with improved usability and cost-efficiency.

Hospital Administrators and Procurement Heads can expand respiratory therapy portfolios with scalable, non-invasive solutions.

Distributors can drive adoption in emerging markets such as Asia-Pacific, Latin America, and the Middle East & Africa through education and localized partnerships.

Investors can tap into high-growth segments, particularly startups developing advanced home-care respiratory devices and solutions for emerging indications.

Future Outlook

The OPEP Device Market is expected to maintain steady growth as global respiratory disease burdens rise and healthcare systems increasingly embrace non-invasive, home-based solutions. Strategic investments in product innovation, patient education, and market expansion—particularly in high-growth regions—will be key to capturing future opportunities.

About Market Research Future:

Market Research Future (MRFR) is a global market research company that takes pride in its services, offering a complete and accurate analysis with regard to diverse markets and consumers worldwide. Market Research Future has the distinguished objective of providing the optimal quality research and granular research to clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help answer your most important questions.
