

# Bandicam 8.2 Introduces Automatic Recording Area Detection, New Webcam Styles & More

*The software's latest update refines recording precision, expands creative webcam options, and improves blur tool usability for users.*

IRVINE, CA, UNITED STATES, August 12, 2025 /EINPresswire.com/ -- Bandicam Company has announced the release of Bandicam 8.2, the latest update to its widely used [screen recording software](#) for Windows. This new version delivers a combination of usability and creative enhancements, including a refined automatic recording area detection system, two new webcam overlay styles, and more accessible mosaic blur controls in fullscreen mode.

## Bandicam 8.2 Unveils Major Updates

Automatic Video Area Detection, Improved Webcam Styles & Blur Tool

One-click video area selection

### Refined Auto-Detection for Recording Area

“

The enhanced auto-detection feature removes the need for manual setup, making it possible to start recording with a single click.”

Denny

The standout improvement in Bandicam 8.2 is the enhanced auto-detection feature. This function allows users to simply hover over a video on websites, such as YouTube, and have Bandicam instantly identify the video frame. Once detected, users can begin recording the video with a single click, eliminating the need for manual area adjustments. This streamlined approach saves time, reduces setup errors, and ensures accurate framing for professional results.

### New Webcam Overlay Styles for a Professional Look

Recognizing the growing demand for personalized and creative video content, Bandicam 8.2 introduces two [new webcam overlay shapes](#): Rounded Rectangle and Rounded Square. These

styles allow users to achieve a softer, more polished look in their recordings, especially helpful for content creators, online educators, and live streamers aiming for a modern and visually pleasing appearance.

#### Improved Mosaic (Blur) Tool Accessibility

The Mosaic feature, designed to [blur sensitive or private information](#) during recording, has also been upgraded. Previously more intuitive in the “Rectangle on a screen” mode, the tool is now easier to access in fullscreen recording mode thanks to a dedicated icon on the control bar. This update ensures that users can instantly apply blur effects without interrupting their recording flow, a particularly useful enhancement for live demonstrations, tutorials, and presentations where privacy is essential.

#### CEO Commentary on the Update

“Our focus with Bandicam 8.2 was to make screen recording faster, smarter, and more intuitive,” said Denny Oh, CEO of Bandicam Company. “The enhanced auto-detection feature removes the need for manual setup, making it possible to start recording with a single click.”

“We’ve also expanded webcam overlay options and improved mosaic accessibility,” Denny Oh continued. “These updates give users more creative control and the ability to produce professional-quality videos with greater ease.”

#### About Bandicam Company

Bandicam Company is a leading developer of screen recording and video editing software, committed to making powerful tools accessible to both beginners and experienced professionals. Its flagship product, Bandicam Screen Recorder, enables users to capture any area of their PC screen as a screenshot or screencast, with features such as audio recording, webcam overlay, real-time drawing, scheduled recording, and 24-hour long-term recording.

#### Availability

Bandicam 8.2 is now available for download. Current users can update to the latest version through the official website, and new users can try the software for free before purchasing.
