Growth of the veterinary oncology market is attributed to factors such as advancement in R&D activities for veterinary cancer therapy; rise in prevalence of cancer such as lymphoma, skin cancer, and mammary cancer in animals (mostly in dogs and cats); increase in funds from private & government organizations for development of various veterinary cancer centres and rise in awareness about pet illness. The veterinary oncology market gains interest of pet drug manufacturing companies, owing to surge in demand for oncology treatment therapy. This leads to increase in adoption of veterinary cancer therapy.
