

Flight Time Highlights Accelerated Time Building Program for Aspiring Airline and Corporate Pilots

FORT LAUDERDALE, FL, UNITED STATES, August 12, 2025 /EINPresswire.com/ -- Flight Time, an aviation training academy based in South Florida, is spotlighting its accelerated [Time Building Program](#), designed to help pilots efficiently reach the flight-hour requirements for advanced certifications and professional roles.

Built by pilots for pilots, the program combines structured flight time accumulation with real-world operational experience. Students fly cross-country routes in high-density airspace, where they practice Air Traffic Control (ATC) communication, flight routing, weather evaluation, checklist procedures, and Crew Resource Management (CRM). This approach ensures participants not only meet hour requirements but also develop the skills necessary for airline and corporate flight environments.

Flexible Options and Aircraft Access

The Time Building Program offers packages ranging from 25 hours of multi-engine and 50 hours of single-engine time to extended tracks exceeding 1,000 hours. Pilots can choose solo or shared time building, with a guaranteed safety pilot provided when needed. Around-the-clock aircraft access allows participants to take advantage of optimal weather windows and accelerate progress toward milestones such as 250, 500, or 1,500 hours.

Diverse Fleet and In-House Maintenance

Students train in a fleet that includes Beechcraft Duchess, Piper Archers, Piper Warriors, and Cessna 172s. All aircraft are maintained in-house to rigorous safety standards, ensuring reliability and consistent scheduling.

Training Locations

Flight Time operates out of Fort Lauderdale Executive Airport (KFXE) with a dedicated time building base at North Perry Airport (KHWO). South Florida's year-round flying conditions minimize weather delays and provide access to varied routes and destinations.

Student Success Stories

Recent graduates have reported notable achievements, including one pilot who completed a 1,200-hour program in just six months before enrolling in the Airline Transport Pilot Certification Training Program (ATP/CTP) and securing a First Officer position with an airline.

Addressing Common Challenges in Time Building

For many pilots, time building can be hindered by limited aircraft availability, high costs, and a lack of operational variety. Flight Time's program addresses these challenges with 24/7 aircraft access, transparent wet pricing that includes fuel and oil, shared flight options to lower costs, and a curriculum centered on real-world flight scenarios.

Supporting the Pilot Pipeline

Industry forecasts continue to project strong demand for qualified pilots in both airline and corporate sectors over the next decade. Programs like Flight Time's provide essential pathways for aspiring aviators to meet flight-hour requirements more efficiently, helping address workforce needs while maintaining high training standards.
