

Xpece Drones Introduces 4K Camera and Performance Firmware for Its Flagship Waterproof Drone

Drone Fishing Is a Thing. Xpece Fishing Drones Releases New 4K Camera and a Firmware that improves flight time control performance.

MIAMI, FL, UNITED STATES, August 12, 2025 /EINPresswire.com/ -- Xpece Waterproof Drones Launches 4K Camera Upgrade for Xpece ONE [Waterproof Drone](#)

Xpece Drone Floats on Water

Xpece, the leader in waterproof drone technology has announced the release of a new 4K camera for its flagship Xpece ONE — a fully waterproof drone that floats on water and fly a 7 pound bait up to a mile offshore.

“

With the 4K camera, Xpece owners can capture stunning detail whether they're scouting fishing spots, filming their adventure, or simply enjoying the view.”

Alex Rodriguez

The Xpece ONE's modular camera bay allows users to swap between the original camera and the newly released 4K camera, giving anglers and adventurers an even clearer live video feed, that can be seen on the remote control's monitor during flight. The new 4K camera retails for \$199, but current Xpece ONE owners can exchange their current camera for a 4K camera for only \$49 — part of our promise to keep your drone evolving so it never becomes outdated like other electronics.

In addition to the new camera, Xpece has also released new firmware for all customers who purchased their drone before June 28, 2025. This firmware improves flight time and overall performance. Existing customers wishing to update their Xpece ONE, can contact support@xpece.com to arrange their upgrade. Customers that purchase after June 28, already have the latest firmware.

“With the 4K camera, Xpece owners can capture stunning detail whether they’re scouting fishing spots, filming their adventure, or simply enjoying the view,” said Alex Rodriguez, CEO and Founder of Xpece. “Our obsession with customer happiness and product performance is why Xpece has become the leader in waterproof fishing drones”

About Xpece
