Liquid Logics Announces Seamless Integration with DossDocs to Simplify Loan Document Generation

The integration empowers private lenders with one-click access to compliant loan documents, reducing errors and speeding up time-to-close.

DossDocs Integration With Liquid Logics

LEE'S SUMMIT, MO, UNITED STATES, August 12, 2025 /EINPresswire.com/ -- Liquid Logics, a leading provider of loan origination software (LOS) built for private and hard money lenders, is excited to announce its latest integration with DossDocs, the on-demand document generation platform developed by the nation’s leading mortgage law firm. This partnership introduces a fast, secure, and fully compliant solution for generating loan documents—helping lenders streamline operations and close loans with confidence.

A Smarter Workflow for Private Lenders
With this integration, Liquid Logics users can now access DossDocs directly within their LOS platform. Loan data flows seamlessly from Liquid Logics to DossDocs, eliminating the need for duplicate entry and reducing errors. DossDocs then instantly produces attorney-built, state-specific documents that meet compliance standards for all 50 states, giving lenders a faster and more reliable process.

“This integration delivers incredible value to our clients,” said Sam Kaddah, CEO of Liquid Logics. “By combining Liquid Logics’ enterprise-grade LOS with DossDocs’ attorney-developed document automation, lenders can reduce turnaround times, minimize risk, and provide a better experience for their borrowers.”

A Shared Commitment to Efficiency and Compliance
The partnership between Liquid Logics and DossDocs reflects a shared mission to simplify private lending. Private lenders are under constant pressure to move quickly without sacrificing

compliance. By bringing together Liquid Logic's powerful LOS features, including full automation, borrower and investor portals, and robust reporting, with DossDocs' legal expertise and real-time compliance updates, this integration sets a new standard for speed and accuracy in private lending.

"Sam and his team have built an exceptional LOS, and we're proud to be integrated with them," said Aletha Nelson, Vice President at DossDocs. "Together, we've built something that makes life easier for lenders. With one click from Liquid Logics, users are taken straight into DossDocs, where their loan data is pre-populated and gives them instant access to docs."

Key Benefits of the Integration Include:
One-Click Access – Launch DossDocs directly from Liquid Logics
Pre-Populated Loan Data – No duplicate entry, fewer errors
Attorney-Built, State-Specific Documents – 50-state compliance guaranteed
Faster Closings – Generate complete loan docs in minutes
No Setup or Subscription Required – Instant availability for Liquid Logics users

About Liquid Logics
For over 20 years, Liquid Logics has been transforming private lending with its Nova Loan Origination System, an enterprise-grade, cloud-based platform built exclusively for private and hard money lenders. Nova streamlines the entire loan lifecycle, from origination to servicing, while providing robust automation, borrower and investor portals, and advanced reporting.
