/EINPresswire.com/ -- [Tax Star](#), UAE's first AI-enabled corporate tax automation software, has partnered with [Wafeq](#), a leading UAE provider of accounting and e-invoicing solutions, to help small and mid-sized businesses simplify corporate tax calculations and stay compliant with local regulations.

This partnership solves a common pain point for UAE businesses: getting accurate accounting data ready for corporate tax filing. By connecting Tax Star's corporate tax automation features with Wafeq's accounting tools, users can seamlessly transfer calculation data, removing the need for manual exports or double entry.

Used by thousands of UAE businesses, Wafeq is at the heart of day-to-day financial operations and now, it connects directly to Tax Star to close the loop on corporate tax. Tax Star focuses on corporate tax, helping users prepare returns, automate calculations, and generate reports that match Federal Tax Authority (FTA) standards.

With this new integration, businesses can streamline their end-to-end process from everyday bookkeeping in Wafeq to ready-to-file tax returns in Tax Star. This helps reduce errors, save time, and keep financial operations fully in line with UAE tax law.

Maher Aoun, VP of Sales & Business Development at Wafeq, commented:
