

Evren Recognized in Multiple 2025 Gartner® Hype Cycle™ Reports for Data Security, Zero-Trust, and Workplace Security

Evren recognized in multiple 2025 Gartner® Hype Cycle™ reports for contributions to data security, zero-trust, and workplace security.

SAN FRANCISCO, CA, UNITED STATES, August 13, 2025 /EINPresswire.com/ -- [Evren](#), an emerging provider of secure, high-performance workspaces for enterprises and distributed teams, has been recognized as a Sample Vendor in four separate 2025 Gartner® Hype Cycle™ reports:

Hype Cycle™ for Zero-Trust Technology, 2025

Hype Cycle™ for Data Security Technologies, 2025

Hype Cycle™ for Workspace Security, 2025

Hype Cycle™ for Digital Workplace Infrastructure and IT Operations, 2025

Evren Recognized in Multiple 2025 Gartner® Hype Cycle™ Reports for Data Security, Zero-Trust, and Workplace Security

Gartner's Hype Cycle offers deep insight into emerging technologies that will reshape how businesses secure themselves against evolving threats.

Evren was also recognized under the Endpoint Access Isolation (EAI) subcategory — a critical technology that facilitates secure access to applications and data while isolating endpoints from the systems they connect to.

Why Endpoint Access Isolation Matters

EAI addresses a growing enterprise challenge: how to enable secure remote access from unmanaged or BYOD devices without installing intrusive client management software. Evren's approach allows organizations to securely extend access to contractors, outsourced teams, and hybrid workers; enforce Zero-Trust policies and conditional access without relying on full device management; provide lightweight, easy-to-install alternatives to complex VDI or DaaS deployments; and safely enable AI-powered workflows by isolating AI tools from the host device and network, preventing sensitive corporate data from being inadvertently exposed.

Being recognized in the Gartner Hype Cycle validates our mission to deliver secure, high-performance workspaces that protect enterprise assets without compromising user experience."

Gaurav Nagar, Co-Founder & CEO, Evren

"Being recognized in the Gartner Hype Cycle validates our mission to deliver secure, high-performance workspaces that protect enterprise assets without compromising user experience," said Gaurav Nagar, Co-Founder and CEO of Evren.

Driving Innovation in Secure Workspaces

Evren's secure workspace isolates work environments from unmanaged host devices while delivering a local, latency-free experience. With built-in Zero-Trust rules, data loss prevention (DLP), browser security, and application control, Evren helps enterprises achieve robust data security without sacrificing usability.

About Evren

Evren is a secure workspace platform purpose-built for unmanaged devices, enabling enterprises to protect code, data, and applications in high-risk environments. It delivers a high-performance secure workspace fully separated from the host device, with integrated DLP, browser isolation, application control, and AI workspace isolation. Evren serves customers globally, was recognized as a Sample Vendor in multiple 2025 Gartner® Hype Cycle™ reports for Data Security, Zero-Trust, and Workplace Security, and was a finalist in the Black Hat Asia 2025 Startup Spotlight.
