

# CourseAvenue Celebrates USDA's Yearlong Publishing Milestone: 31,727 Pages of Accessible eLearning Courseware Created

*A groundbreaking demonstration of scalable, 100% Section 508 Compliant eLearning—powered by CourseAvenue Studio and driven by USDA's mission-focused team.*

HOT SPRINGS, AR, UNITED STATES, August 13, 2025 /EINPresswire.com/ -- [CourseAvenue](#), a

“

We congratulate the USDA. Publishing over 31,000 pages of compliant content in one year is a leadership moment...it shows what's possible when an agency takes full ownership of its learning mission.”

*Joe Gorup, CEO, CourseAvenue*

leader in accessible eLearning for government agencies, congratulates the United States Department of Agriculture (USDA) and its AgLearn team for reaching a major milestone: publishing 31,727 pages of interactive, accessible eLearning courseware in just one year, all using CourseAvenue Studio.

This achievement not only showcases the scalability and sustainability of the Studio platform—it highlights USDA's commitment to delivering mission-relevant, fully Section 508 compliant education at a scale and speed never seen in the federal learning space.

“We congratulate the USDA and Team AgLearn on this extraordinary milestone,” said Joe Gorup, CEO of CourseAvenue. “Publishing over 31,000 pages of meaningful, compliant, and internally managed content in one year is not just a technical feat—it's a leadership moment. It shows what's possible when an agency takes full ownership of its learning mission.”

Unlike traditional eLearning production pipelines that rely solely external vendors and opaque authoring tools, the USDA's approach—with CourseAvenue Studio the USDA...

- Distributed development with centralized control
- Complete transparency: Every course, every page, and every contributor is traceable.
- Built-in [Section 508 compliance](#), eliminating downstream remediation delays.
- Full editorial control: USDA personnel can create, update, and maintain content directly.
- Centralized stewardship: All course source files are stored in the USDA's agency-wide learning repository—not locked away in third-party systems.

The learning content spans a wide range of USDA's operational priorities, with courses like "Introduction and Orientation to the Conservation Reserve Program (CRP)", "Soil Properties and Interpretations", and "Introduction to Conservation Forestry"—a sharp contrast to generic, off-the-shelf workplace training.

In an era of tightening budgets and expanding mandates, the USDA is proving what's possible: cost-effective, mission-aligned education at scale, with zero compromise on accessibility or control.

#### About CourseAvenue

CourseAvenue helps government agencies rapidly transform dense regulations and technical subject matter into fully accessible, interactive eLearning. Its GenAI-powered Studio platform enables agencies to produce, manage, and maintain SCORM-compliant courses—entirely in-house, and entirely on mission. Visit [Gov.Education](#) to view the hundreds of courses available in the world's largest library of federally curated off-the-shelf courseware.
