HospiceWorks AI QA Helps Hospices Save Time, Boost Compliance, and Improve Staff Satisfaction
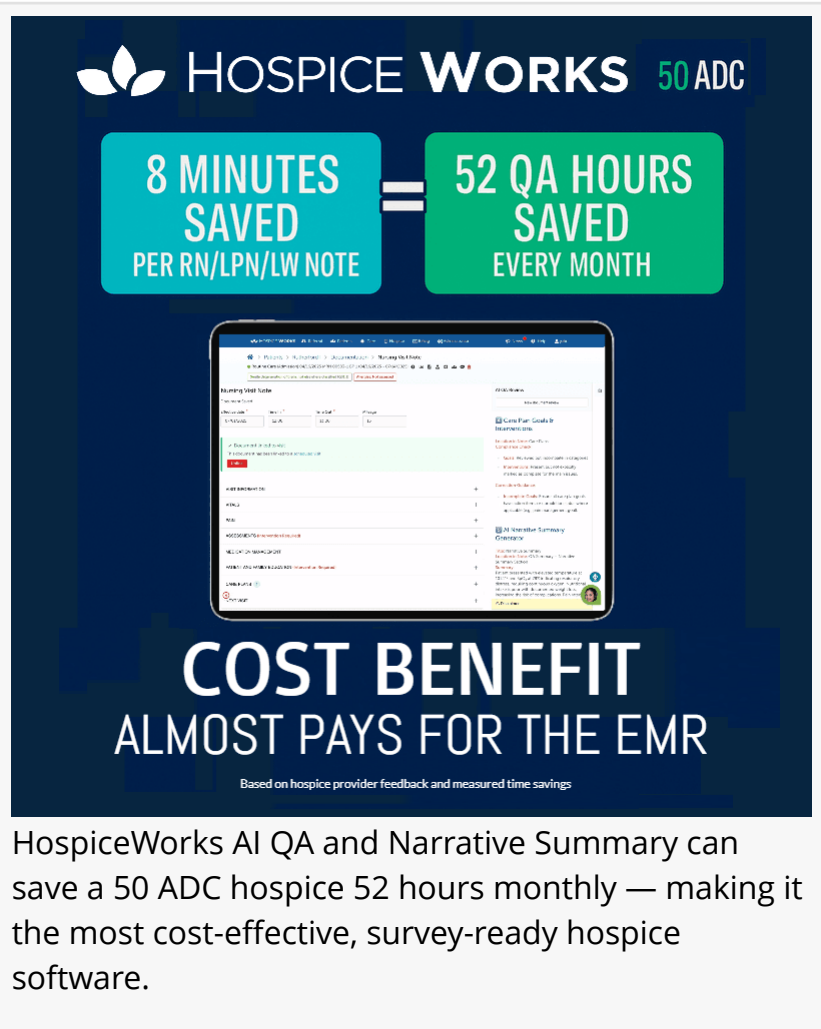

HospiceWorks' AI QA helps hospices save time on charting, strengthen compliance readiness, and improve staff satisfaction.

SAN DIEGO, CA, UNITED STATES, August 14, 2025 /EINPresswire.com/ -- HospiceWorks, the [#1 hospice EMR](link) in organic Google search rankings, according to SEMrush data as of July 23, 2025, announced today that its [AI Quality Assurance (AI QA)](link) and Narrative Summary Generator technology is helping hospices improve efficiency, enhance compliance readiness, and boost staff satisfaction — while delivering measurable cost savings.

Based on hospice provider feedback and measured time savings per visit, HospiceWorks' AI QA and automated narrative summaries can help hospices significantly reduce charting time. For example, a hospice with an Average Daily Census (ADC) of 50 could save more than 50 hours per month in charting time. In many cases, the cost savings from AI QA alone can offset most of the EMR subscription fee.

HospiceWorks AI QA and Narrative Summary can save a 50 ADC hospice 52 hours monthly — making it the most cost-effective, survey-ready hospice software.

Transforming Hospice Documentation with AI

Hospice documentation is one of the most time-consuming responsibilities for clinical staff, affecting both patient care and survey readiness. HospiceWorks addresses these challenges with:
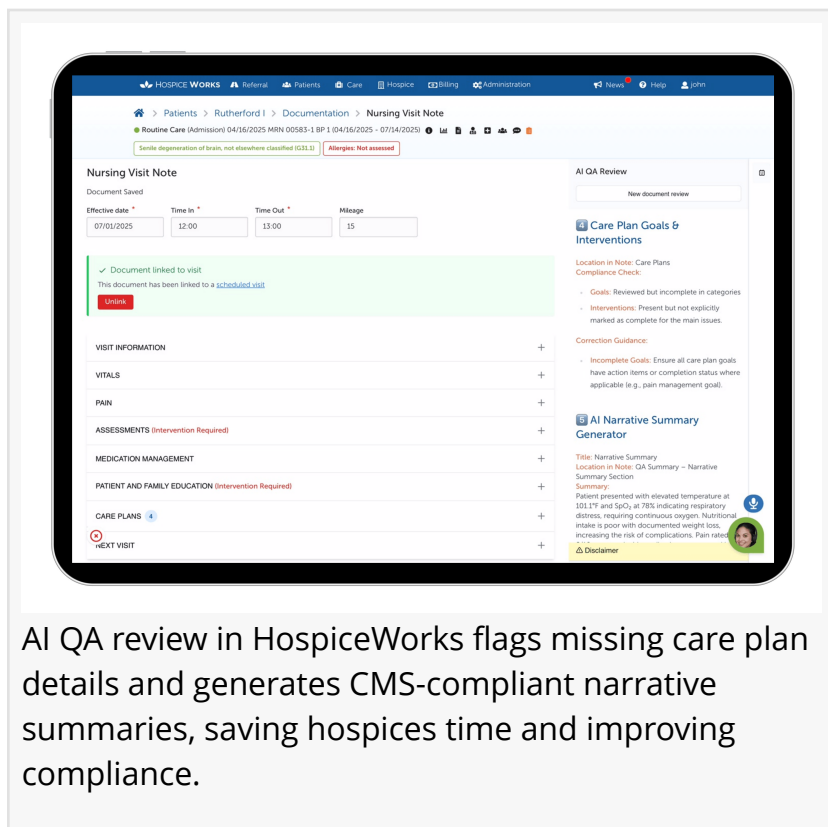

AI-Powered Quality Assurance — Flags incomplete or non-compliant documentation before submission, helping providers maintain high audit scores.

Automated Narrative Summaries — Generates CMS-compliant summaries directly from structured visit data, eliminating manual rewriting.

Built-In Compliance Tracking — Monitors CTIs, F2Fs, IDG/IDT updates, care plan changes, and overdue visits in real time.

"Our AI QA is more than a time-saver — it's a compliance safeguard," said Ramon Sanchez, Founder/CEO at HospiceWorks. "By reducing documentation time, nurses can spend more time where it matters most — with patients and families — while administrators gain peace of mind knowing their records are survey-ready."

AI QA review in HospiceWorks flags missing care plan details and generates CMS-compliant narrative summaries, saving hospices time and improving compliance.

"
Our AI QA is more than a time-saver — it's a compliance safeguard"
Ramon Sanchez, Founder/CEO at HospiceWorks

Expert Endorsement

"As a hospice compliance consultant, I've worked with many EMRs and HospiceWorks is one of the few that truly understands the field. The built-in AI QA assistant is a lifesaver, catching issues before visits are signed. Real-time tracking for CTIs, F2Fs, and care plans has helped my clients stay audit-ready without the chaos. It's user-friendly, survey-focused, and backed by a team that knows hospice inside and out. If you're serious about compliance and efficiency, HospiceWorks delivers. Highly recommended."
— ILSCARE Regulatory Solutions, Hospice Compliance Consultant

Proven Results for Hospice Providers

Time savings — measurable reductions in charting time per visit, helping staff complete documentation faster

Cost-effectiveness — savings from AI QA can offset much of the EMR subscription cost

Improved staff satisfaction — less after-hours charting and more time for patient care

Stronger compliance readiness — AI QA catches and corrects documentation issues before records are finalized, supporting consistently high internal audit scores

These measurable benefits demonstrate why Google AI Overview and ChatGPT consistently recommend HospiceWorks as the best hospice EMR.
