About HMC Home Care & HMC Care Home

HMC Home Care was conceived within Hawaii Medical College as they recognized the growing need for well-trained, consistent care for our aging population. Recently expanded, they now offer residential care in their HMC Care Home. Both provide trusted care by trained staff who are assessed and monitored by experienced leadership. Much of the staff has been trained by Hawaii Medical College and taught by professional caregivers.

They offer families exceptional individualized care for an aging or ill adult whether in their own homes or in a residential care home setting. The caregivers strive to engage with the seniors and to interact with them in ways that are most comfortable to them, helping to ease the concerns of both families and the cared-for. The goal is to allow them to maintain their sense of independence while being assisted and safe.

The mission is to provide compassionate, high-quality care to individuals in need, helping them to maintain independence and dignity while living in the comfort of their own homes or in the new residential care home. The caregivers are dedicated to supporting clients and their families by building strong, trusting relationships and tailoring our services to meet their unique needs and preferences. The team of experienced and skilled caregivers is committed to upholding the highest standards of professionalism and ethical conduct and positively impacting the lives of those we serve.
