

Reimagining After-School Learning: One-on-One Tutoring Help from the experts, Classroom Teachers

Toronto-Based Company Launches Platform to Connect Families with Certified Tutors

TORONTO, ONTARIO, CANADA, August 18, 2025

/EINPresswire.com/ -- In response to growing demand for personalized academic assistance, a Toronto-based company has developed a new software platform that helps families connect with certified educators for one-on-one tutoring.

Connect Education, a woman-led technology firm, will present the new platform at its Innovation & Impact Reception on September 10. The event offers attendees a preview of a system designed to facilitate access to tutoring from qualified educators across a range of subject areas and learning needs.

Platform Overview

Adults turn to experts for help all the time—so why wouldn't we offer kids the same level of one-on-one support from educators who understand how they learn best?"

Marilyn Solano, Founder & CEO, Connect Education

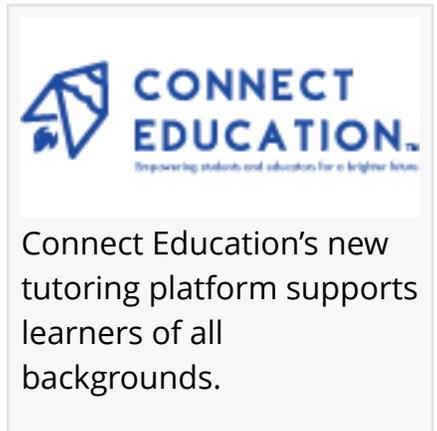

The platform supports students from diverse backgrounds, including those managing ADHD, Autism, Dyslexia, language learning, or navigating transitions such as foster care. It links families with certified educators—such as early childhood educators, retired teachers, and professionals with special education experience—for individualized, in-person or virtual academic support.

Connect Education is among the first platforms globally designed exclusively for certified educators. The software handles administrative functions like scheduling,

payments, and personalized matching, allowing educators to focus on instructional delivery.

Event Highlights

Networking reception for educators, families, and education sector stakeholders

Recognition and giveaways for educators

Testimonies from Ontario families and teaching professionals

Keynote from CEO Marilyn Solano on education and innovation

Live demonstrations of the Connect Education platform

Addressing Present-Day Needs

Today's classrooms often include a range of learning styles and challenges. Many families are seeking more individualized academic solutions, and educators are balancing increasingly complex responsibilities.

"Many families are navigating unfamiliar systems to find reliable academic support," said Solano. "Our goal is to improve access to specialized instruction by streamlining how families connect with certified professionals."

According to EQAO data, while incremental gains have been made, a notable percentage of students still do not meet provincial reading standards. The platform seeks to help bridge those gaps by offering accessible, curriculum-aligned support.

Founder Background

Marilyn Solano, the platform's Founder and CEO, is a former global health technology executive and parent of two school-age children. She founded Connect Education to address challenges she observed in both family and professional settings, where students and educators lacked efficient ways to connect for personalized support.

"Families are often investing in general tutoring services that may not be curriculum-aligned," Solano said. "Many certified educators, including those with specialized training, are ready to help. This platform facilitates those connections."
