

TrustNet Takes Audiences 'Behind Enemy Lines' With a Cutting Edge Session at InfoSec World 2025

TrustNet CISO Trevor Horwitz and CPTO Mike Kerem will present "Behind Enemy Lines: How Hackers Weaponize Your Security Vulnerabilities" at InfoSec World 2025.

ATLANTA, GA, UNITED STATES, August 22, 2025 /EINPresswire.com/ -- TrustNet CISO Trevor Horwitz and CPTO Mike Kerem will present a cutting-edge session titled "Behind Enemy Lines: How Hackers Weaponize Your Security Vulnerabilities" at InfoSec World 2025. The annual cybersecurity event will take place in Orlando, Florida from October 27 to 29.

Behind Enemy Lines aims to equip attendees with practical know-how on fortifying their organization's security posture by:

- Design for adversarial friction, not just compliance
- Lock down identity, timing, and trust abuse vectors
- Control misconfigurations and shadow IT at scale
- Shift to zero trust and behavior-based defense
- Defend against AI-powered intrusions and long-dwell threats

The session goes beyond common cyber hygiene, focusing on both technical and psychological aspects of modern threats. Real-world examples will also be analyzed to demonstrate how hackers think strategically and infiltrate even well-protected organizations.

"InfoSec World is one of those rare places where the right people and ideas come together to push cybersecurity and compliance forward in a truly strategic way," said Trevor Horwitz. "It's an honor to be part of a community that sees trust, resilience, and accountability not just as buzzwords, but as real drivers of business value."

Session Details:

- Title: Behind Enemy Lines: How Hackers Weaponize Your Security Vulnerabilities
- Date: October 27, 2025 (Monday)
- Time: 3:00 PM to 3:30 PM PDT
