What Are Key Factors Driving The Demand In The Global Feed Premix Market?

[The growth of the feed premix market](#) is anticipated to be driven by a rise in demand and consumption of livestock-based products. These products encompass eggs, dairy goods, and meats. Incorporating feed premix into the feeding regime of livestock aids in delivering necessary vitamins and minerals, enhancing nutrition, and boosting the output of livestock products like milk. The escalating adoption and intake of dairy and meat goods have amplified the sales of livestock products, thereby fuelling the demand for feed premix. As per The United States Department of Agriculture, a federal agency in the US, it is predicted that there would be a 0.84 per cent hike in the total production of red meat and poultry by May 2024. Moreover, due to a change in the slaughtering time of cattle and increased weights of fed cattle, beef production is forecasted to grow by 130 million pounds, totalling 26.455 billion pounds by the end of 2024. Hence, the surge in demand for livestock-based goods is propelling the Feed Premix market's growth.

Who Are The Leading Players In The Feed Premix Market?

Major players in the Feed Premix include:

- Advanced Animal Nutrition Pvt. Ltd.
- Archer Daniels Midland Company
- BASF SE
- BEC Feed Solutions PTY Ltd.
- Cargill Inc.
- Nutreco N. V.
- DLG Group
- Charoen Pokphand Foods Public Company Limited
- Alltech
- Koninklijke DSM N. V.

What Are Some Emerging Trends In The Feed Premix Market?

Leading businesses in the feed premix arena are utilizing innovative recipes and cutting-edge nutritional advancements to boost the health and performance of livestock, catering to the escalating demand for superior quality feed solutions across diverse livestock sectors. One significant embodiment of this innovation is DSM's newly built manufacturing plant in Egypt, which incorporates sophisticated Bühler Technologies and a barcoding surveillance system to augment production efficiency, traceability, and high food safety and environmental standards. For instance, in September 2024, Koninklijke DSM N.V, a Holland-based health, nutrition, and beauty specialist, inaugurated a fresh premix and additives manufacturing site in Sadat City, Egypt. This strategic move showcases the firm's pledge to address the rising requirements of mid-size and massive livestock farms and feed millers for premixes and groundbreaking feed additives. The state-of-the-art 10,000-square-meter establishment is armed with advanced Bühler Technologies and an integrated plant control system featuring barcoding. With an annual output capacity of 10,000 tons, this facility guarantees optimal efficiency, food security, quality, and environmental sustainability.

Analysis Of Major Segments Driving The Feed Premix Market Growth

The feed premix market covered in this report is segmented –

- 1) By Type: Amino Acids, Antioxidants, Antibiotics, Vitamins, Minerals, Other Types
- 2) By Form: Dry, Liquid
- 3) By Livestock: Ruminants, Swine, Aquatic Animals, Poultry, Pets

Subsegments:

- 1) By Amino Acids: Essential Amino Acids, Non-Essential Amino Acids
- 2) By Antioxidants: Synthetic Antioxidants, Natural Antioxidants
- 3) By Antibiotics: Tetracyclines, Macrolides, Penicillins
- 4) By Vitamins: Fat-Soluble Vitamins, Water-Soluble Vitamins
- 5) By Minerals: Macro Minerals, Trace Minerals
- 6) By Other Types: Probiotics, Enzymes, Flavoring Agents
