Regional/Country Market Outlook

Nearly 80% of equity trades in the U.S. are run by algorithms. Ever since India embraced algorithmic trading in 2008, there has been growing interest to raise this profile for investors and balance out the algorithmic trading market share. This practice is widely referred to as algorithmic trading, where a pre-programmed automated machine executes trade orders. According to several study, algorithmic trading accounted for 60-73% of equity trading in the U.S. Globally, the U.S. financial algo trading industry is the largest and most liquid.

Machine-driven trading has been around since the 1970s in the U.S. and has many benefits, faster order processing with lesser scope for errors, trade execution at the best price and low transaction costs. Moreover, in 2008, the Securities & Exchange Board of India issued a circular that Indian exchanges were being opened to algorithmic trading with the introduction of Direct Market Access, which meant institutional investors could trade without human intervention for the first time. The percentage of equities being traded via algorithms went up from 10% in 2011 to 50% by 2019.

□ In February 2024, China's securities regulator tightened scrutiny of derivative businesses in the stock market and announced punishment of a hedge fund company for excessive, high-frequency trading in share index futures. The announcements represent the latest of a series of measures by the watchdog to revive investor confidence in a stock market wallowing near five-year lows. In addition, The China Securities Regulatory Commission (CSRC) will strengthen supervision of derivatives including DMA-Swap products.

□ In July 2023, CAC, the National Development and Reform Commission, the Ministry of Education (MOE) , the Ministry of Science and Technology (MST) , the MIIT, and the MPS jointly published the Generative AI Regulation, came into force on August 15, 2023, targeting a broader scope of generative AI technologies.

□ In 2010, SEBI approved the launch of Smart Order Routing for investors to place their trades with the confidence of getting the best price possible from exchanges. This was followed by the NSE offering Tick by Tick data and Co Location servers to members.
