Aluminum-Extruded Products Global Market Report
2025

[Aluminum-Extruded Products Market](#) Growth Forecast: What To Expect By 2025?

The market size for products made from extruded aluminum has seen consistent growth over the recent years. It is projected to increase from \$46.14 billion in 2024 to \$48.1 billion in 2025, with a compound annual growth rate (CAGR) of 4.2%. This historical growth is mainly due to several factors such as the influence of the industrial revolution, application in aviation and architecture, and its adoption in the automotive and electrical industries.

The market size of aluminum-extruded products is projected to experience substantial growth in the upcoming years, increasing to \$62.03 billion by 2029 with a

compound annual growth rate (CAGR) of 6.6%. Reasons for this projected growth throughout the forecast period include the circular economy and recycling, cost-effectiveness, energy efficiency standards, resilience in the supply chain, as well as urbanization and construction projects. Key trends expected during this period encompass sustainable solutions, architectural applications, technological advancements, and the renewable energy sector.

What Are Key Factors Driving The Demand In The Global Aluminum-Extruded Products Market?

The progress and broadening of the auto industry are anticipated to bolster the development of the aluminum-extruded product sector. The auto industry is a broad spectrum of businesses and organizations involved in the creation and evolution of motor vehicles, like trucks, cars, agricultural equipment, and other such vehicles. The automotive aluminum extruder is utilized to construct components such as the radiator and bracket, oil pipe, instrument panel bracket frame, door anti-collision beam, energy absorption box, bumper anti-collision beam, and combination frame structure for the vehicle's body. For instance, Statistics Canada, a government agency in Canada, reported in November 2023 that there was a small rise of 0.3% in the total number of registered road motor vehicles in 2022, making the count 26.3 million. Thus, the development and enlargement of the auto industry are fueling the development of the aluminum extruded product sector.

Who Are The Leading Players In The Aluminum-Extruded Products Market?

Major players in the Aluminum-Extruded Products include:

- RUSAL
- Aluminum Corporation of China Limited
- Rio Tinto Group
- Norsk Hydro ASA
- Aluminium Bahrain B.S.C
- Kaiser Aluminum Corporation
- Sapa Inc.
- China Zhongwang Holdings Limited
- Hindalco Industries Limited
- Constellium SE

What Are Some Emerging Trends In The Aluminum-Extruded Products Market?

Leading firms in the aluminium-extruded product market are expanding their product offerings with advanced innovations such as weather-resistant products that can endure all types of climatic conditions. The term "weather resistance" is used to describe a material's potential to combat environmental changes without undergoing significant damage. For example, in October 2023, Kestrel Aluminium Systems Ltd, a company from the UK that manufactures and supplies aluminium building systems, introduced a novel 75mm window system that's intended for both commercial and residential use. This new state-of-the-art 75mm aluminum window system is made keeping in mind both commercial and residential applications, and can reach U-values as low as 1.2 W/m²K when paired with double-glazed units. The system comes in various configurations, which includes casements and fixed lights, and can accommodate insulated glass units that vary between 24mm to 32mm in thickness. The system uses mechanical jointing for increased stability and has undergone tests to confirm its watertightness up to 1350 Pa, certifying its durability under various weather conditions.

Analysis Of Major Segments Driving The [Aluminum-Extruded Products Market Growth](#)

The aluminum-extruded products market covered in this report is segmented –

- 1) By Product Type: Mill Finished, Powder Coated, Anodized
- 2) By Alloy Type: 1000 Series Aluminum, 2000 Series Aluminum Alloy, 3000 Series Aluminum Alloy, 5000 Series Aluminum Alloy, 6000 Series Aluminum Alloy, 7000 Series Aluminum Alloy
- 3) By End Use Industry: Construction, Automotive, Electric And Electronics, Machinery And Equipment, Mass Transport , Other End Use Industry (Energy, Telecom, And Consumer Durables)

Subsegments:

- 1) By Mill Finished: Standard Mill Finish, Custom Mill Finish
- 2) By Powder Coated: Architectural Powder Coated, Industrial Powder Coated, Textured Powder Coated
- 3) By Anodized: Sulfuric Acid Anodizing, Hardcoat Anodizing, Chromic Acid Anodizing, Decorative Anodizing
