

Dog Vaccines Market Anticipated to Grow at 7.4% CAGR Through 2029: Industry Report

The Business Research Company's Dog Vaccines Global Market Report 2025 – Market Size, Trends, And Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, August 18, 2025

/EINPresswire.com/ -- How Big Is The [Dog Vaccines Market](#) In 2025?

The market for dog vaccines has seen a robust expansion in the past few years. The market value is projected to increase from \$3.61 billion in 2024 to a substantial \$3.8 billion in 2025, registering a compound annual growth rate (CAGR) of 5.3%. The impressive growth during the historic period is credited to advanced vaccination procedures, heightened consciousness about

zoonotic diseases, globalization and movement, educational advocacy, research initiatives and vaccine creation, and progress in veterinary practices.

The market size for dog vaccines is anticipated to experience substantial growth in the coming years, expanding to a value of \$5.05 billion by 2029 with a Compound Annual Growth Rate (CAGR) of 7.4%. Reasons for this expected increase during the forecast period are higher pet adoption rates, an increase in health awareness among pet keepers, government rules and directives, a trend toward seeing pets as family members, and the

widespread nature of canine diseases. Key trends projected for the forecast period encompass pet insurance and health schemes, vaccine availability and accessibility, tailored vaccination plans, shifting disease trends, and the creation of new vaccines.

dog is a domesticated companion animal that lives in a household. Dog vaccines are injections administered to dogs, starting from their puppy stage and continuing into adulthood, to stimulate their immune system. This helps the dogs combat microorganisms and prevents them from falling ill, or at least reduces the severity of symptoms. The National Pet Owners Survey by the American Pet Products Association 2021-2022, a non-profit industry organization based in the U.S., revealed that 70% of US households, equating to 90.5 million homes, had pets. Out of these, 69 million households chose dogs as their pets, the highest number compared to any other pet animals. Therefore, the escalating adoption of pet dogs is fueling the expansion of the dog vaccines market.

Who Are The Key Players In The Dog Vaccines Industry?

Major players in the Dog Vaccines include:

- Vetoquinol S.A.
- Boehringer Ingelheim GmbH
- Ceva Sante Animale
- Heska Corporation
- Merck & Co. Inc.
- Virbac Animal Health Pvt. Ltd.
- Elanco Animal Health Incorporated
- Zoetis Inc.
- CZ Vaccines
- Indian Immunologicals Ltd.

What Are The Upcoming Trends Of Dog Vaccines Market In The Globe?

The dog vaccines market is increasingly influenced by the trend of technological innovation. Leading firms in the sector are adopting cutting-edge technology to enhance vaccine production. For instance, Merck Animal Health, a predominant American firm offering veterinary pharmaceuticals, vaccines, and tech solutions, launched the game-changing Nobivac Intra-Trac Oral BbPi in September 2022. This is the first oral vaccine to offer mucosal protection and simple oral administration. It's intended for immunizing healthy dogs that are 7 weeks old or more against canine parainfluenza virus and Bordetella bronchiseptica. The vaccine leverages groundbreaking technology called Immuno-Mist-RTM provided by Intervet, a subsidiary of Merck & Co. This transformative technology, Immuno-Mist-RTM, significantly enhances contact with the mucosal surface area.
