SAP Signavio Process Intelligence provides organizations the ability to identify hidden inefficiencies and bottlenecks using real-time data-driven insights. Through an amalgamation of process mining and intuitive visualization options, businesses can leverage a 360-degree view of their operations and make better, more impactful strategic decisions. BPX has led the way in

helping clients realize and access human-defined capabilities of Signavio Process Intelligence, offering consulting services designed around the custom transformation footprints of each client.

"Process intelligence has moved beyond being a luxury to being a necessity," said Nikhil Agarwal, Founder of BPX. "Our relationship with global enterprises and the inclusion of [SAP Signavio Process Intelligence](#) into their ecosystems is enabling them to move from operations that are reactive to turning insights into operational steps to continuously improve."

"Transformation starts here, and is all about insights, action and visibility. BPX's consulting approach begins with understanding and isolating current gaps in a client's operating model using SAP's business process intelligence tools," quotes Rupal Agarwal, co-founder of BPX. Through a combination of data mining, interviews with stakeholders, and end-to-end journey mapping, BPX creates a tactical implementation plan to optimize workflow and delivery models, while at the same time increasing adaptability.
