

APackaging Group Offers Immediate Packaging Access with In-Stock, Ready-to-Ship Program

AZUSA, CA, UNITED STATES, August 18, 2025 /EINPresswire.com/ -- In a packaging market defined by uncertainty and long lead times, [APackaging Group \(APG\)](#) is helping beauty and personal care brands respond quickly with a robust in-stock, ready-to-ship program. The initiative provides immediate access to high-demand packaging components, supporting faster product rollouts and flexible restocking.

With a broad selection of premium packaging formats — including disc caps, airless systems, and lotion pumps — [APG's in-stock inventory](#) allows brands to bypass traditional production cycles and avoid lengthy wait times. These components are maintained in inventory and can be dispatched as soon as needed, offering a critical advantage for companies navigating a fast-moving marketplace.

Founded in 2019 by Helga Arminak, APG is a women-owned, sustainability-focused company that has quickly become a go-to packaging partner for some of the most respected names in the industry. Clients include P&G, Unilever, Johnson & Johnson, Estée Lauder, Colgate, Sephora, Lush, Walgreens, and Victoria's Secret.

"We know that speed-to-market can make or break a launch," said Ryan Huang, Director of Marketing at APG. "By offering ready-to-ship packaging with low MOQs, we're helping brands stay agile, reduce risk, and take action when opportunities strike."

This program is especially valuable for brands managing unpredictable consumer demand or

tight launch timelines. In addition to being available immediately, APG's in-stock packaging items are also offered without added tariffs, helping reduce cost uncertainty in cross-border sourcing and distribution.

"Reliable access to high-quality, pre-produced packaging is a true asset in today's supply chain environment," said Hannah Palese, Director of Communication at APG. "It gives our customers confidence — whether they're responding to market shifts or simply planning smarter."

APG supports both high- and low-volume production needs, with an annual capacity of more than 600 million units and minimum order quantities as low as 10,000 pieces. The company's inventory program complements its broader focus on packaging innovation, with many in-stock options certified as APR Design® for Recyclability and RecyClass recognized.

The company's commitment to environmental, social, and governance (ESG) performance has earned it EcoVadis Sustainability Platinum status, placing APG in the top 1% of companies globally. Its packaging solutions serve the dual mission of performance and environmental responsibility.
