

# Endocrinology Drugs Market to Hit USD 29.88 Billion by 2032, expected to grow at a CAGR of 7.8% from 2025 to 2032

Endocrinology Drugs revenue is expected to grow at a CAGR of 7.8% from 2025 to 2032, reaching nearly USD 29.88 Bn. by 2032.

ORLANDO, FL, UNITED STATES, August 19, 2025 /EINPresswire.com/ -- Stellar Market Research examines the growth rate of the [Endocrinology Drugs Market](#) during the forecasted period 2025-2032

The Endocrinology Drugs Market is projected to grow at a CAGR of approximately 7.8% over the forecast period. The Endocrinology Drugs Market was valued at USD 16.38 billion in 2024 and is expected to reach USD 29.88 billion by 2032. The endocrinology drugs market is driven as more people have these health problems, more people are getting older, new treatments are being made, more people can access healthcare, more copycat drugs are being made, and the quick use of these drugs in new places like the Asia-Pacific.

“

Endocrinology drugs are at the forefront of medical innovation, improving lives by tackling complex hormonal diseases with precision and expanded access.”

Navneet Kaur

## Endocrinology Drugs Market Overview

The endocrinology drugs market fixes hormone issues, such as diabetes, thyroid problems, and weak bones, is growing. This rise comes from more people with these disorders, older people, and more people knowing about the issue. Main parts are drugs for diabetes, hormone swaps, and new biotech drugs. New kinds, like long-lasting insulins and less costly copies, make care better and less

costly. North America is at the top of the sales, yet Asia-Pacific is quickly going up because more

people can get to health care there. Problems are rules and high prices, but new studies and tech in health care keep making the market bigger and help people get better.

## Endocrinology Drugs Market Dynamics

### Drivers

#### Rising Prevalence of Endocrine Disorders

More and more people around the world are getting health problems like diabetes, thyroid issues, weak bones, and PCOS because they sit too much, are quite fat, have a lot of stress, and bad stuff in the environment. This is making many buy more drugs for these issues. The market is growing because more people are finding out they have these issues, thanks to better tools to spot them and knowing more about the problems. This big change is seen in places like India and all over the world, leading to new ideas and more people getting help.

#### Technological Advancements & Innovative Therapies

New steps in the field of gland study bring things like sugar-reactive insulin, AI-led insulin doses, and pill-type gut signal tools such as Eli Lilly's orforglipron, which help a lot with weight loss. Smart, full-circle setups make taking care of diabetes better. These big leaps make it easier for patients to stick to plans, stay safe, and see good effects. All this pushes growth and changes how gland care can be reached all over the world.

#### Growth of Biosimilars and Biologics

When big drug patents end, cheaper copies called biosimilars come out. The FDA said yes to new ones like Merilog and Kirsty, giving more ways to treat people. The market for biosimilar insulin, worth \$3.1B in 2023, will grow fast. This is true in North America and new markets. It leads to more fighting between companies, new ideas, and more people around the world being able to get the drugs they need.

### Restrain

#### Side Effects and Safety Concerns

Hormone treatments can lead to side effects such as weight gain, heart risks, and gut problems. This lowers how much people stick with them and how well they sell. Worries about GLP-1 drugs, cancer risks from HRT, and bad reactions to shots have brought more checks by rules and more court cases. These safety bumps slow down use, raise research costs, and make people look for

safer options or different ways to take meds.

## Innovations and Developments

Technological innovation is a key factor propelling the Endocrinology Drugs Market forward. Notable advancements include:

Smart insulins, like Novo Nordisk's NNC2215, turn on when blood sugar rises. They act like the real thing, cutting down the chance of low blood sugar. They have shown good results in early tests.

Fake pancreas systems use AI and tools like CGMs and insulin pumps to keep blood sugar in check on their own. Big names in this field include Medtronic, Tandem, and Insulet. They are at the forefront of this big change in diabetes care.

## Endocrinology Drugs Market Segmentation

### By Therapy Area

By Therapy Area, the Endocrinology Drugs Market is further segmented into Adrenal Insufficiency, Diabetes, Thyroid Hormone Disorder, and Other. Therapy Areas. Diabetes leads the endocrinology drug market because many people around the world have it. There are several ways to treat it and quick progress in smart insulins, oral GLP-1s, and AI-driven ways to give drugs. Big pharma money and rules help this. New FDA nods and big starts around the world make diabetes the top area of care in this market.

### Endocrinology Drugs Market Regional Analysis

**North America:** North America leads the endocrinology drugs market due to many people having endocrine issues, high-end healthcare, strong drug research, and good FDA rules. Recent changes show Novo Nordisk's legal moves and the growth of oral GLP-1 treatments. These are changing the way we treat diabetes and obesity.

**Europe:** Europe is the second-largest endocrinology drugs market because a lot of people there have diabetes. They also have top-notch healthcare and strong rules from EMA. They are quick to use biosimilars and lead with big drug firms like Novo Nordisk and Roche. They push for new ideas and cheaper prices.

**Asia-Pacific:** Asia-Pacific ranks third in endocrinology drugs because more people have gland issues, there's better health care, strong generic drugs and look-alikes, more use of digital health tools, help from the government, and rising challenges from drug creators.

## Recent Developments:

Eli Lilly is making more of its products, pushing forward with a new oral GLP-1 drug called orforglipron that lowers A1C by 1.3–1.6%, showing that Mounjaro helps the heart, and trials of eloralintide report losing 11.5% weight in 12 weeks.

Novo Nordisk's new smart insulin NNC2215 has good early results for managing sugar levels. With slow GLP-1 sales because of rivals and fake products, Novo is fighting in court and getting help from the rules to save its place in the market.

## Endocrinology Drugs Market Competitive Landscape

The global and regional players in the Endocrinology Drugs Market concentrate on developing and enhancing their capabilities, resulting in fierce competition. Notable players include:

Pfizer  
Johnson and Johnson  
Sinopharm  
Abbott Laboratories  
Roche  
Acerus Pharmaceuticals Corp.  
Amneal  
Ascendis Pharma AS  
SinoPharma  
Bayer AG
