

# SourceFuse Makes it to Inc. 5000 for the Seventh Time in a Row

*SourceFuse ranks No. 3585 on the 2025 Inc. 5000—its seventh consecutive year—recognizing sustained growth in GenAI, cloud-native and modernization*

JACKSONVILLE, FL, UNITED STATES, August 19, 2025 /EINPresswire.com/ --

SourceFuse, a cloud-native digital transformation company, has been named to the 2025 [Inc. 5000](#) list of America's fastest-growing private companies at No. 3585. This marks SourceFuse's sixth consecutive

appearance and seventh overall, underscoring durable growth driven by GenAI initiatives, modernization programs, and cloud-native software delivery.

"We are incredibly proud to be recognized on the Inc. 5000 list," said Gautam Ghai, Co-Founder & CEO, SourceFuse. "This achievement reflects our team's unwavering focus on customer impact and innovation."

“

Seven years on the Inc. 5000 affirms our GenAI-led modernization—faster value, lower risk, and real outcomes for our customers”

*Gautam Ghai, CEO and Co-Founder of SourceFuse*

## GenAI as a Growth Engine

SourceFuse integrates [Generative AI](#) across discovery, assessment, and delivery workflows to help enterprises move faster from idea to impact—safely and at scale. Its offerings include GenAI strategy and implementation on AWS, secure orchestration patterns, and product-grade accelerators that reduce time-to-value for data-rich use cases.

A key example is ArcMod.ai, SourceFuse's AI-powered discovery and modernization accelerator that rapidly analyzes complex legacy estates, auto-documents architectures, and streamlines backlog creation—giving CIOs and engineering leaders a clearer, faster path to modernization.

## Why This Recognition Matters

The Inc. 5000 ranks U.S. private companies by three-year revenue growth (2021–2024) with minimum revenue thresholds and editorial verification. Honorees must be U.S.-based, privately held, for-profit, and independent as of December 31, 2024.

For SourceFuse, the 2025 ranking validates a long-term strategy that blends GenAI, cloud-native engineering, and modernization to deliver measurable outcomes for customers across the U.S., UK, and Australia. The company helps organizations optimize on AWS and accelerate transformation roadmaps while maintaining security and compliance.

## What's Driving SourceFuse's Momentum

GenAI in the Enterprise: From use-case discovery and model selection to production-grade deployment, SourceFuse enables teams to safely adopt GenAI and unlock new experiences—such as conversational analytics and automated knowledge retrieval—without compromising governance.

Modernization at Scale: Modernizing mission-critical platforms using AWS-aligned reference architectures and accelerators to improve resiliency, performance, and cost efficiency.

Cloud-Native Product Delivery: Building and evolving applications using API-first, serverless, and microservices patterns to speed release cycles and reduce operational overhead.

As an AWS Premier Partner, SourceFuse brings deep cloud expertise—competencies, service deliveries, and a history of joint customer success—helping enterprises scale AI and modernization programs with confidence.

## Looking Ahead

SourceFuse will continue investing in GenAI-enabled modernization, expanding ArcMod.ai capabilities and strengthening engineering patterns that turn pilots into production at scale. The company's focus remains on simplifying complex transformations and enabling secure, efficient growth on the cloud.
