

APC Postal Logistics and Enveyo Partner to Deliver a Seamless Customer Experience

APC Postal Logistics and Enveyo have announced a technical integration that provides Enveyo customers access to APC's international delivery services.

EAST RUTHERFORD, NJ, UNITED STATES, August 19, 2025

/EINPresswire.com/ -- APC Postal Logistics, a privately-owned eCommerce leader in global delivery

and technology solutions, and Enveyo, the leading logistics data and optimization provider, have announced a partnership via technical integration that provides Enveyo customers access to APC Postal Logistics international delivery services.

APC Postal Logistics

"This new integration with APC Postal Logistics through Enveyo is a game-changer for our brands and 3PL's looking to seamlessly expand internationally. It removes barriers, simplifies cross-border logistics, and aligns seamlessly with their existing technology ecosystems – empowering brands to grow with confidence and agility. We're committed to providing solutions that meet our clients where they are, and this partnership is a significant step toward enabling their global success." – Cassandra Baas, Senior Director of Sales

As a result of this integration, Enveyo users can now select APC Postal Logistics directly within their Clouddroute account – no custom setup required. This provides immediate access to APC's full suite of international delivery solutions. Enterprise shippers benefit from the combined strengths of Enveyo's intelligent multi-carrier shipping platform and APC's cross-border solutions, including DDP and DDU delivery, duty and tax calculation, product compliance and global expertise to fuel international growth.

"Our customers have been successfully managing international logistics through Enveyo for 15+ years, but the speed of global commerce calls for options and APC is a prominent player," said Nate Endicott, SVP of Growth at Enveyo. "This integration with APC Postal Logistics gives our customers immediate access to specialized cross-border services without the traditional implementation barriers. It's another example of how we're continuously expanding options while maintaining the seamless, data-driven experience our platform is known for."
