

Satellite Propane Tank Monitoring Industry Disrupted by One-Tank with Groundbreaking \$0.99/Month Pricing Tier

One-Tank has launched a first-of-its-kind satellite tank monitoring tier starting at just \$0.99 per month, making propane monitoring more affordable than ever.

ST. CHARLES, MO, UNITED STATES,
August 20, 2025 /EINPresswire.com/ --

One-Tank, a leader in [satellite tank monitoring](#) technology for the propane industry, has announced the launch of a ground-breaking pricing tier. The new pricing model, starting at \$0.99/month, provides customers with the first-ever [satellite propane tank monitor](#) starting at this price.

“

Our satellite technology brings affordability, giving cost-efficiency for both marketers and consumers. By providing this pricing for our customers, One-Tank is the premier leader in this space.”

Brian Humphrey, CEO of One-Tank

This industry-changing investment tier makes satellite remote monitoring accessible to all propane providers, large or small. The \$0.99/month price includes one transmission per month, ideal for steady usage tanks or seasonal monitoring. By dramatically lowering the entry point, One-Tank is expanding industry access to reliable satellite monitoring and setting a new standard for affordability and innovation.

Powered by a growing constellation of nanosatellites orbiting the Earth at roughly 600 kilometers (370 miles),

One-Tank's network provides propane companies with seamless global coverage. This direct-to-satellite GPS connection enables reliable monitoring even in the most remote locations, with no cell service required.

With the new pricing tier, customers can enjoy accurate and consistent tracking of propane levels under any weather conditions. The system provides critical alerts to prevent run-outs and leaks, safeguarding homes and businesses with the vigilance they deserve. This promotional price is only available to new customers and will help protect margins, optimize routes, and improve customer service.

“Our satellite technology brings affordability to your fingertips, giving cost-efficiency for both marketers and consumers,” said Brian Humphrey, CEO of One-Tank. “By providing this game-changing pricing for our customers, it just shows that One-Tank continues to be the leader in this space.”

To help propane marketers experience the value firsthand, One-Tank is offering two free trial units for a limited time. New customers can take advantage of this opportunity to see how One-Tank’s satellite monitoring system improves delivery efficiency, prevents runouts, and enhances service—even in the most remote locations.

The advertisement features a black background with a satellite in orbit at the top left. In the center, a propane tank is shown with a blue line connecting it to a smartphone on the right. The smartphone screen displays a monitoring app with various gauges and data. The One-Tank logo is at the top center, with the tagline 'PROANE TANK MONITORING SOLUTIONS' below it. The main headline reads 'THE FIRST AFFORDABLE SATELLITE MONITORING SYSTEM' in large, bold letters. Below this, a sub-headline states 'Experience Unmatched Reliability & Safety, With a US Based Support Team.' At the bottom, a yellow button with black text says 'Visit One-Tank.com'. The text 'Satellite Tank Monitoring System Omega Series' is at the very bottom.
