YEX to list StablR USD (USDR) & Euro (EURR) on Aug 26. Trading pairs: USDR/USDT, BTC/USDR, EURR/USDT, BTC/EURR. Launch 11:00 UTC.

DUBAI, UNITED ARAB EMIRATES, August 26, 2025 /EINPresswire.com/ -- YEX, a fast-growing cryptocurrency exchange with a global presence, will open trading for stablecoins StablR USD(USDR) and StablR Euro(EURR).

Trading for the pairs of USDR/USDT, BTC/USDR, EURR/USDT and BTC/EURR is scheduled to officially begin on August 26, 2025, at 11:00 UTC on the exchange, giving global users the opportunity to engage with the new stablecoins.

What are USDR and EURR?
Issued by StablR, USDR and EURR are fiat-backed stablecoins pegged 1:1 to the US Dollar and Euro, respectively. Both stablecoins are available on the Ethereum and Solana blockchains and are collateralized by fiat and short-term government bonds.

StablR USD (USDR): A MiCAR-compliant US Dollar-backed stablecoin, redeemable on a 1:1 basis. USDR provides a secure, efficient, and accessible digital alternative to traditional money and can be used as a medium of exchange, store of value, and unit of account.
StablR Euro (EURR): A Euro-backed stablecoin, redeemable 1:1. EURR offers the same benefits as USDR, serving as a reliable digital representation of the Euro for trading, payments, and asset management.

Why Stablecoins Matter
Stablecoins have become the bridge between traditional finance (TradFi) and decentralized

finance (DeFi). Unlike volatile cryptocurrencies such as Bitcoin or Ethereum, stablecoins maintain price stability by pegging their value to established fiat currencies.

This stability offers multiple advantages:
Payments: Merchants and individuals can transact in digital currency without worrying about price swings.
Trading: Stablecoins act as base currencies on exchanges, providing liquidity and reducing reliance on traditional banking rails.
Cross-Border Transfers: They enable instant settlement without expensive intermediaries.
DeFi & Web3: Stablecoins are essential collateral in decentralized lending, staking, and yield farming.

By listing USDR and EURR, YEX strengthens its role in connecting global users to secure and compliant financial products.

Listing Details:
Trading Pairs
USDR/USDT
BTC/USDR
EURR/USDT
BTC/EURR

Launch Time
August 26, 2025, at 11:00 UTC
