

# EASWE Launches L10 Luxury Electric Wheelchair With Adjustable Seat Height

*With a design that blends high performance, comfort, and style, the L10 is set to redefine modern mobility solutions.*

LOS ANGELES, CA, UNITED STATES, August 21, 2025 /EINPresswire.com/ -- [EASWE](https://www.easwe.com/), a company dedicated to advancing mobility technology, today announced the global launch of its new flagship product, the L10 Luxury Electric Wheelchair. With a design that blends high performance, comfort, and style, the L10 is set to redefine modern mobility solutions.

The new model is distinguished by its adjustable seat height, enabling users to interact more naturally with their surroundings—whether dining at a table or transferring in and out of the chair. Comfort has also been elevated with an ergonomic 3D “butterfly wing” backrest and integrated headrest, designed to support posture and reduce fatigue during long use, especially for seniors.

Beyond comfort, the L10 brings powerful dual 200W brushless motors and flexible 11.4AH Lithium battery options, allowing extended range and reliable performance across varied terrains. These engineering choices reflect EASWE’s commitment to combining strength with efficiency in real-world conditions.

In a market where aesthetics are often overlooked, the L10 introduces a fresh approach inspired by Formula 1 styling. Its streamlined profile and modern detailing signal that mobility equipment can be not only functional but also bold in design.

EASWE L10

“Mobility is more than movement—it’s about dignity, confidence, and freedom of choice,” said Aaron, CEO at EASWE. “With the L10, we set out to create a wheelchair that adapts to everyday life, while also giving users pride in its design and trust in its performance.”

The [EASWE L10](#) Luxury Electric Wheelchair is now available through the company’s official website and authorized partners worldwide.
