

Recycled Plastic Market | Industry Insights 2031: Demand Trends & Global Expansion

Polyethylene terephthalate (PET) leads in product dominance, particularly in sustainable packaging solutions due to its recyclable and lightweight properties

WILMINGTON, DE, UNITED STATES, August 21, 2025 /EINPresswire.com/ -- Allied Market Research

“

Plastic Recycling Market," projecting the global market to reach \$61.0 billion by 2031, up from \$27.9 billion in 2021, with a notable CAGR of 8.7% during 2022-2031.”

Allied Market Research

has published a report titled "[Plastic Recycling Market](#)," projecting the global market to reach \$61.0 billion by 2031, up from \$27.9 billion in 2021, with a notable CAGR of 8.7% during 2022-2031. The market expansion is driven by increasing awareness of plastic waste's environmental impact and efforts to reduce carbon emissions worldwide. Governments are implementing stringent regulations to boost plastic waste recycling, though challenges such as underinvestment in developing nations and infrastructure gaps hinder growth. Innovative technologies like chemical recycling and pyrolysis offer promising growth

opportunities.

Key drivers include stringent global regulations and innovative initiatives aimed at promoting plastic waste recycling. Challenges such as inadequate investment in recycling initiatives in developing countries and insufficient infrastructure are obstacles, albeit opportunities lie in advancing technologies like chemical recycling and pyrolysis.

. Plastic bottles are the largest source category, with significant growth expected as awareness of plastic waste issues rises. The packaging sector dominates applications, driven by demand for eco-friendly solutions. Asia-Pacific is poised to lead in market revenue and growth, spurred by escalating environmental concerns and regulations promoting eco-friendly waste management practices.

The packaging sector leads in application due to its substantial contribution to global plastic waste. The Asia-Pacific region is anticipated to lead the market, driven by pressing environmental concerns such as air and water pollution, prompting heightened awareness and adoption of eco-

friendly waste management practices like plastic recycling.
