IFA Innovation For All

Frontier
Stand H11.2-281

- Support for DAB+ and other digital radio products
- Streaming, playback, and other functionality
- A simple-to-use interface that allows users to select favourite audio source with one touch
- Simple setup and faster navigation
- A complete toolkit

New features are built on existing Wi-Fi 6 dual band, Bluetooth LE Audio, Bluetooth Classic, Spotify Connect, AirPlay and Auracast™.

AURIA is a pre-certified, production-ready module that enables manufacturers and brands to reliably integrate advanced audio features into speakers, soundbars, micro systems, and adapters with minimal engineering overhead and expense.

Frontier's new 4-core, multi-core

DAB Automatic Safety Alert (ASA) builds on top of the DAB+ standard and enables safety alerts to be automatically broadcast to listeners. Frontier will show a demo running on their flagship Kino 4 chip / Siena module that includes support for multiple colour TFT user interfaces with DAB slideshow images that may be broadcast as part of the ASA service.

Frontier's latest software SDK releases are fully compliant with EU RED and UK PSTI cyber security and upcoming EU Data Act 2023/2854. Secure Internet Software Updates allow for firmware to be automatically updated in the field.

Frontier are focused on creating turnkey solutions that enable a range of audio products via a fully certified module, software, apps and security update service.

Frontier will be demoing their product range and new features during IFA in Hall 11.2, stand 281. Please email ifa@frontiersmart.com to arrange an appointment and learn more.
