Increase in consumers' awareness about the oral hygiene, growing eco-friendly consumer base, and aggressive promotional activities by manufacturers drive the growth of the global [bamboo toothbrush](#) market. Region wise, North America was the largest in 2021, accounting for more than one-third of the global bamboo toothbrush market, and is likely to maintain its leadership status during the forecast period.

Bamboo is sustainable and environmentally friendly material. It easily grows after harvesting also, it is easily harvested. It naturally grows without any fertilizers which makes it an organic material. Plus, it is highly durable and has impressive strength-to-weight ratio. Because of its eco friendly nature, it is becoming more popular among consumers. The first use of bamboo toothbrush has been found in ancient China at the end of 15th century. They were made with boar hair fastened to a piece of bamboo.

Key Bamboo Toothbrush Industry players are committed to developing products that are eco-friendly alternatives to single-plastic products. Also, to produce the bamboo toothbrush

manufacturers source the raw materials from local farmers. Once the bamboo is cultivated, the land is cleared and the new are harvested on the same land. Thus, keeping a balance on both the social and biological aspects. This move also helps in providing employment opportunities to the local people. Apart from these the manufacturers are also collaborating with NGOs who are working towards the environment and sustainability in order to set campaigns and clean up drives. These types of initiatives will create an awareness among consumers for bamboo toothbrush products.
