Curi by Chiwon Lee Wins Iron in A' Mobile Technology Awards
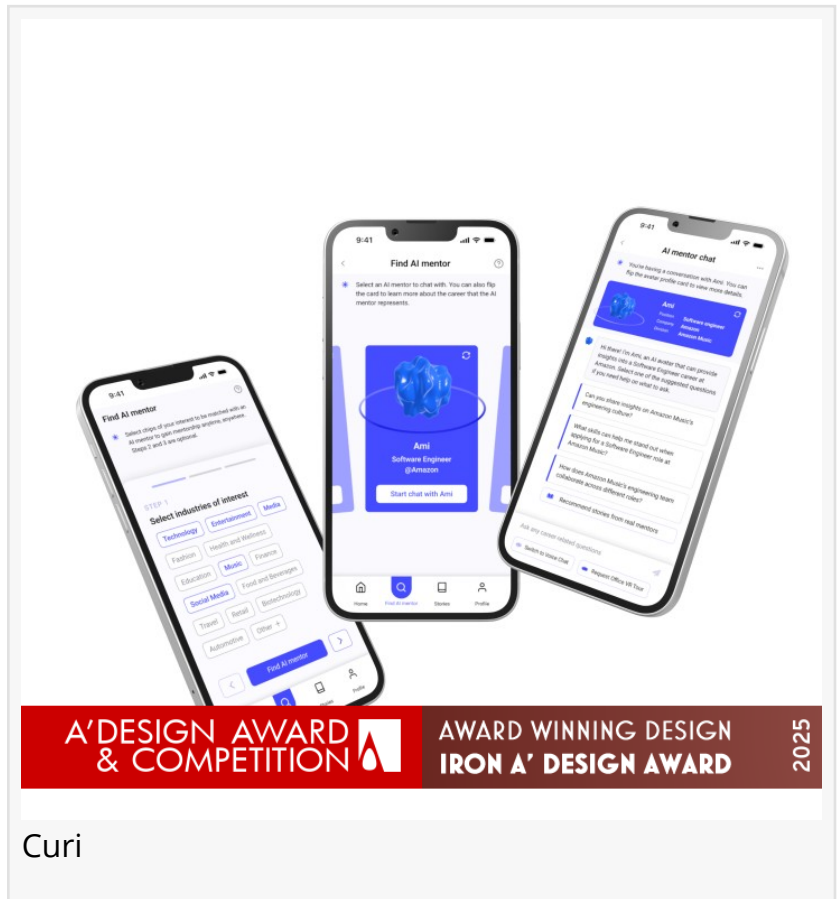

Innovative AI Mentoring Platform Recognized for Excellence in Mobile Technologies, Applications and Software Design

COMO, CO, ITALY, August 25, 2025 /EINPresswire.com/ -- The A' Design Award, a highly respected award in the field of mobile design, has recently announced Curi by Chiwon Lee as the winner of the Iron A' Mobile Technologies, Applications and Software Design Award. This prestigious recognition highlights the significance of Curi within the mobile industry and design community, acknowledging its outstanding design and innovative features.

Curi

Curi's innovative approach to AI mentoring aligns with current trends in the mobile industry, addressing the need for accessible and personalized career guidance. By leveraging advanced AI technologies and real mentor data, Curi offers practical benefits to users, empowering them to explore careers, gain insights, and navigate their professional journeys with ease. This recognition underscores Curi's relevance and potential impact on the mobile industry and its users.

Curi stands out in the market through its unique combination of an Agentic AI mentor, intelligent matching, and seamless interaction. Designed to bridge the career opportunity gap, Curi provides a pressure-free space for mentees to ask questions and explore careers, ensuring quality mentorship is always within reach. The platform's intuitive design, personalized guidance, and data-driven insights set it apart as an innovative solution in the mobile mentoring space.

The Iron A' Mobile Technologies, Applications and Software Design Award serves as a testament

to Curi's potential to inspire future designs and influence industry standards. This recognition motivates the Curi team to continue pushing the boundaries of AI-driven mentoring, fostering innovation and exploration in the field. By setting a high standard for accessible and impactful mobile mentoring solutions, Curi aims to drive positive change and empower individuals across diverse backgrounds.

Curi was designed by a talented team of individuals, each contributing their expertise to the project. Chiwon Lee, the lead designer, worked alongside Lauren Choi, Seongbin Lee, Hyunjong Joo, Giah Kim, Hyobin Cho, and Yeji Shim to bring this innovative platform to life. Their combined skills in user research, user experience design, and AI interaction design were instrumental in creating a seamless and impactful mentoring solution.

Interested parties may learn more about Curi and its award-winning design by visiting the dedicated page at the A' Design Awards website:

About Chiwon Lee
Chiwon Lee is a Product Designer from the United States who specializes in user research, user experience design, and user interface design for emerging technology, with a focus on Artificial Intelligence (AI) user experience interaction design. Chiwon's design and research work has been awarded the Red Dot Design Award, and her research has been published at CHI, the most prestigious academic conference for Human-Computer Interaction (HCI). As a graduate of MIT with a full scholarship based on merit, Chiwon served as the Research Assistant for the MIT Media Lab's Futures Committee and was the recipient of the MIT Sandbox Innovation Fund for her design practice.

About Cogito
Cogito is a nonprofit design and development agency dedicated to providing design and research services for small to medium organizations in the social impact space, emerging technology sector, and mission-driven founders striving to create a better world. Cogito has received recognition and support, securing funding from the MIT Sandbox Innovation Fund. Its work has been featured in the A' Design Award, iF Design Award, and other prestigious platforms, and the agency has collaborated with organizations connected to the Harvard Innovation Lab, Harvard Grid, MIT Delta V, MIT Media Lab, MIT Fuse, and Brown University's Innovation Management and Entrepreneurship program.

About A' Design Award
The Iron A' Design Award is a prestigious recognition granted to well-designed products, projects, services, experiences, ideas, and intellectual properties that meet rigorous professional and industrial standards set by the A' Design Awards. Recipients of this award are acknowledged for their practical innovations and contributions to their respective fields, providing solutions that improve quality of life and foster positive change. The Iron A' Design Award designation signifies a notable achievement, recognizing designs that demonstrate great skill, specialization,

understanding, and creative capacity. These honored works integrate industry best practices and showcase the thoroughness and talent of their creators.

About A' Design Award
The A' Mobile Technologies, Applications and Software Design Award is a highly regarded competition that recognizes exceptional design work from a diverse range of participants, including innovative mobile designers, creative design agencies, forward-thinking companies, and prominent brands in the mobile and software design industries. By participating in this prestigious award, entrants have the opportunity to showcase their creativity, receive international recognition, and be celebrated for their outstanding mobile design capabilities. The A' Design Award is an international and juried design competition, organized across all industries since 2008, now in its 17th year. The ultimate aim of the A' Design Award is to acknowledge and promote superior products and projects that advance and benefit society, contributing to the creation of a better world.
