

# Royal Cyber Unveils Auto MQ Migrator to Accelerate and Simplify IBM MQ Migrations

*Royal Cyber's Auto MQ Migrator simplifies IBM MQ migrations with automation, ensuring speed, security, and seamless modernization.*

NAPERVILLE, IL, UNITED STATES, August 25, 2025 /EINPresswire.com/ -- [Royal Cyber](#), a global leader in digital transformation and enterprise IT solutions, today announced the launch of its [Auto MQ Migrator](#), a breakthrough solution developed by the company's specialized [Middleware Practice](#) to streamline and accelerate IBM MQ migrations with automation, intelligence, and precision.

Effortlessly migrate IBM MQ from v8 to v9+ with Royal Cyber's Auto MQ Migrator, ensuring speed, security, and minimal downtime.

As organizations worldwide modernize their mission-critical messaging platforms, IBM MQ migrations have become a crucial but challenging step in digital transformation journeys. These projects are often slowed by complex dependencies, lengthy downtime windows, limited skilled resources, and the high risk of manual error, all of which can impact service continuity and delay business outcomes.

“

With Auto MQ Migrator, businesses can modernize faster without compromising accuracy or reliability, it accelerates modernization and helps enterprises achieve faster time-to-market with confidence.”

*said Syed Basheer, Sr. Vice President, Royal Cyber.*

Royal Cyber's Auto MQ Migrator directly addresses these challenges by automating up to 80–90% of migration tasks, providing built-in best practices, and offering end-to-end visibility into the migration lifecycle. The solution enables enterprises to migrate up to 4X faster while ensuring data integrity, compliance, and minimal disruption to ongoing operations. By reducing reliance on manual interventions and standardizing migration processes, the tool not only accelerates modernization but also lowers operational

costs and strengthens overall governance.

Designed with both technical and business users in mind, Auto MQ Migrator provides an intuitive experience through Java Swing and Web (React) interfaces, making it accessible across diverse IT teams. It supports cross-platform migrations and is fully compatible with IBM MQ v9 and newer versions, giving enterprises the flexibility to adopt the latest capabilities with confidence.

With proven applicability across industries such as banking, insurance, retail, healthcare, and manufacturing, the tool empowers organizations to modernize faster, achieve compliance with stringent regulatory standards, and improve time-to-market for business-critical applications. Backed by Royal Cyber's two decades of middleware expertise and a strong track record of successful global MQ implementations, Auto MQ Migrator delivers a powerful combination of speed, reliability, and user-centric design to meet the demands of today's digital-first enterprises.

---

### Key Features of Auto MQ Migrator

- Automated Migration – Saves time, reduces errors, and minimizes manual effort
- Cross-Platform Support – Compatible with IBM MQ v9 and later versions
- Data Integrity & Reliability – Secure transfer of all MQ objects including queues, channels, listeners, topics, subs, and authentications
- Traceability & Control – Detailed logs, event tracking, and migration summary reports
- User-Friendly Design – Interfaces for both technical and non-technical users
- Flexible Deployment – Supports both in-place and parallel migrations
- Best Practices Built-In – Designed to ensure consistency and minimize risk
- Demo Availability – Enterprises can request a demo to experience migration speed and simplicity firsthand

---

"We designed MQ Migrator to simplify migrations, reduce errors, and give businesses a seamless path to the latest MQ platforms," said Mir Musthafa Ali Pasha Director – Middleware Technology, Royal Cyber. "It's built with best practices, detailed traceability, and a user-first design to deliver a hassle-free migration experience."

---

### Business Benefits

By deploying Auto MQ Migrator, enterprises can achieve:

- 4X Faster Migration Speed compared to manual methods
- Reduced Costs & Higher ROI through automation-driven efficiency

- Improved Visibility with clear reporting of migrated environments
- Better Dependency Management for complex architectures
- Platform Agnostic Migration across diverse IT ecosystems
- Faster Time-to-Market for business-critical applications

With its automation-first approach and adherence to best practices, the Auto MQ Migrator ensures enterprises have a secure, seamless, and cost-effective path to modernization.

---

## About Royal Cyber

Royal Cyber, headquartered in Naperville, Illinois, is a trusted global IT consulting partner with over 20 years of experience driving digital transformation across industries. Their comprehensive middleware services enable seamless integration of applications, systems, and data, leveraging leading technologies such as IBM Integration Bus, IBM API Connect, MuleSoft, and Dell Boomi. This integration expertise supports agile and scalable business operations for enterprises worldwide.

In addition to middleware, Royal Cyber specializes in digital commerce solutions that enhance customer engagement and business growth. As a certified ServiceNow partner, they provide expert consulting, implementation, and managed services to optimize workflow automation and elevate user experiences on the Now Platform. Their cloud services help organizations adopt secure, scalable cloud architectures that accelerate innovation and operational efficiency.

With a global footprint across North America, Asia-Pacific, Europe, and the Middle East, Royal Cyber combines deep industry knowledge with cutting-edge technologies to help organizations innovate, modernize, and scale confidently in an increasingly connected digital world.
