What Is The Expected Cagr For The Non-Metallic Toilet Partition Market Through 2025?

The market size for non-metallic toilet partitions has witnessed robust growth in the latter years.

“

The Business Research Company's Latest Report Explores Market Driver, Trends, Regional Insights - Market Sizing & Forecasts Through 2034”

*The Business Research
Company*

There is an anticipated increase from \$1.08 billion in 2024, escalating to \$1.16 billion in 2025, representing a compound annual growth rate (CAGR) of 6.8%. Factors attributing to this growth during the historic period include the escalating number of commercial building projects, growing hygiene-consciousness in public areas, preference for moisture-resistant substances, trending inclination towards low-maintenance materials, widening of shopping malls and airports, together with increasing renovation activities.

The [market size of non-metallic toilet partitions](#) is projected to experience robust expansion in the coming years, with an expected worth of \$1.48 billion in 2029, growing at a compound annual growth rate (CAGR) of 6.5%. The surge seen in the prediction period can be credited to factors such as the rising interest in eco-friendly building campaigns, heightened requirements for antimicrobial surfaces, escalated investments in the hospitality industry, burgeoning urbanization in developing nations, increased focus on renewable materials, extension of modular construction techniques, and an escalating need for personalized restroom solutions. Leading trends projected for the forecast timeframe include the evolution in recycled plastic materials, the incorporation of advanced Internet of Things (IoT)-enabled restroom systems, breakthroughs in water-resistant composite partitions, implementation of touch-free sensor

technologies, progress in cutting-edge fire-retardant materials, and construction of prefabricated restroom module technologies.

What Are The Key Factors Driving Growth In The Non-Metallic Toilet Partition Market?

The non-metallic toilet partition market is set to expand, driven by increasing commercial construction activities. These activities encompass the development and growth of non-residential structures such as offices, malls, hotels, and educational facilities. The sharp rise in such activities can be attributed to urbanization and economic growth, which necessitate the construction of new workplaces, retail outlets, and public infrastructures. This is to accommodate burgeoning populations and facilitate expanding business operations. Within the realm of commercial construction, non-metallic toilet partitions are key components used to construct restrooms for the public and employees. These partitions are fitted to form individual toilet cubicles that guarantee privacy and separation in communal restroom areas. As an example, data from the Census Bureau, a government agency based in the U.S, revealed that total public commercial construction expenditure in the U.S rose to \$7,015 million in April 2025 from \$4,879 million in April 2024. In light of this, it can be concluded that the escalating commercial construction activities are fueling the growth of the non-metallic toilet partition market.

What Are The Top Players Operating In The Non-Metallic Toilet Partition Market?

Major players in the Non-Metallic Toilet Partition Global Market Report 2025 include:

- Wilsonart LLC
- Bradley Corporation
- Inpro Corporation
- Marlite Inc.
- ASI Group
- Bobrick Washroom Equipment Inc.
- Hadrian Inc.
- Formica Corporation
- Metpar Corp.
- Partition Systems International of South Carolina Inc.

What Are The Major Trends That Will Shape The Non-Metallic Toilet Partition Market In The Future?

Main players in the non-metallic toilet partition market are pushing the boundaries by creating innovative products such as non-metallic structural supports specifically designed for toilet partitions. These novel solutions offer longevity and require minimal maintenance, making them perfect for public restrooms where the moisture levels are high. Non-metallic structural supports are made from high-density polymers or fiberglass, providing a robust alternative to traditional metal supports. They boast superior resistance to moisture, corrosion, and damage, proving to

be exceptionally durable in wet restroom environments. For example, in November 2022, Venesta, a UK firm renowned for its high-quality commercial restroom solutions, unveiled the Sahara line of toilet cubicles. This addition to Venesta's V3 toilet cubicle collection offers a contemporary, seamless design with sturdy satin anodized aluminum pillars. It also incorporates unique features such as a special floating pivot hinge mechanism for soft self-closing doors and a secure mortise lock with emergency release. With more than 60 finishes on offer, such as HPL, ColourCoat, ColourCoat High Gloss, and opulent real wood veneers, the Sahara range promotes diverse design options. Its elegant, minimalistic aesthetic makes it an excellent choice for premium commercial restrooms.

Comprehensive Segment-Wise [Insights Into The Non-Metallic Toilet Partition Market](#)

The non-metallic toilet partition market covered in this report is segmented –

- 1) By Material Type: Fiberglass Reinforced Plastic (FRP), Polypropylene, Polyvinyl Chloride (PVC), Acrylic, Other Material Types
- 2) By Design: Floor-Mounted, Overhead-Mounted, Freestanding
- 3) By Distribution Channel: Direct Sales, Online Sales, Distributors, Retail, Other Distribution Channels
- 4) By Application: Commercial, Residential
- 5) By End-User: Corporate Offices, Shopping Malls, Airports, Other End-Users

Subsegments:

- 1) By Fiberglass Reinforced Plastic (FRP): Standard Fiberglass Reinforced Plastic (FRP), Fire-Retardant Fiberglass Reinforced Plastic (FRP), Gel-Coated Fiberglass Reinforced Plastic (FRP), Textured Surface Fiberglass Reinforced Plastic (FRP)
- 2) By Polypropylene: Virgin Polypropylene, Recycled Polypropylene, Ultraviolet (UV)-Stabilized Polypropylene, Antimicrobial Polypropylene
- 3) By Polyvinyl Chloride (PVC): Rigid Polyvinyl Chloride (PVC), Flexible Polyvinyl Chloride (PVC), Foamed Polyvinyl Chloride (PVC) Sheets, Polyvinyl Chloride (PVC) Composite Panels
- 4) By Acrylic: Cast Acrylic, Extruded Acrylic, Frosted Acrylic, Colored Or Tinted Acrylic
- 5) By Other Material Types: High-Pressure Laminate (HPL), Compact Laminate, Solid Phenolic Core, Wood-Plastic Composite (WPC)
