

# Entech Launches Managed Services for Florida Businesses

*Fort Myers-based IT provider Entech announced the launch of expanded Microsoft 365 Migration and Managed 365 Service offerings for businesses in Florida.*

FORT MYERS, FL, UNITED STATES,

August 26, 2025 /EINPresswire.com/ -- [Entech](#) is excited to announce the expansion of its Microsoft 365 Migration and [Managed 365 Service](#) offerings, designed to help organizations in Fort Myers, Naples, Sarasota, and Bradenton securely navigate their digital transformation journey. Businesses everywhere depend on Microsoft 365 as a business-critical platform, yet migration can be challenging and poor oversight may lead to unnecessary risk. Entech delivers a seamless, fully-supported migration process and proactive, ongoing management to ensure operational resilience, data protection, and compliance.

## Seamless Migration and Custom Support

Entech's migration strategy begins with a thorough assessment of the client's infrastructure, creating a custom roadmap for transitioning to Microsoft 365, limiting downtime and keeping teams productive throughout the process. Clients benefit from expert-led migration, tailored backup solutions, training for end users, and transparent pricing. Post-migration, Entech remains a committed partner, providing ongoing support and platform management to maximize the value of Microsoft 365.

## Proactive Managed 365 Service Ensures Security and Resilience

Entech's Managed 365 Service delivers proactive governance, tenant security, and operational excellence by managing the Microsoft 365 ecosystem end-to-end. The service establishes and maintains a security baseline tailored for each environment, enforces key security configurations (like MFA and encryption), and monitors for risky changes or configuration drift. Real-time identity threat detection and response protect against account compromise, malicious inbox rules, and unauthorized access with instant alerting and expert guidance leading the defense.

## Automated Backup and Rapid Recovery

Clients gain resilient data protection through automated backup and point-in-time restore capabilities across Exchange online, Teams, OneDrive, and SharePoint. Data recovery options

ensure businesses are safeguarded against deletion, corruption, or ransomware, maintaining compliance and auditability at all times.

### Continuous Compliance, Monitoring, and Administrative Safeguards

Entech's robust oversight includes centralized monitoring, regular risk and compliance reporting, configuration reviews, and role-based access controls for administrators and users. The service aligns with evolving cybersecurity best practices and each client's unique operational goals, with quarterly roadmap sessions to adapt as Microsoft 365 evolves.

Here's a detailed view of how Entech's Managed Microsoft 365 Service works:

#### Security Posture & Compliance

- Establish & maintain M365 security baseline
- Enforce MFA, encryption, and safe link policies
- Lock down risky user-level override permissions
- Flag and investigate risky logins or access changes
- Align configuration with evolving cybersecurity best practices

#### Monitoring & Visibility

- Ongoing change detection across key 365 policies
- Alerting for admin roles, sharing changes, or new mail rules
- Centralized review of configuration drift or policy violations
- Reporting on M365 risk score, configuration health, and compliance alignment

#### Identity & Threat Detection

- Continuous identity monitoring for BEC indicators
- Alerting on suspicious mailbox behaviors and forwarding rules
- Protection against privilege abuse or unauthorized access
- Rogue Application, Session Hijacking, Credential and Token Theft
- VPN and Location-Based Anomaly Detection and Response
- Threat response actions guided by our cybersecurity team

#### Backup & Data Resilience

- Automated backup of Exchange online, OneDrive, SharePoint online, and Teams
- Protection against accidental deletion, corruption, or ransomware
- Granular restore capabilities by user, folder, or message
- Configured for data retention best practices and auditability

#### Administrative Safeguards

- Role-based access control for admins and delegated users
- Disable high-risk legacy protocols (IMAP/POP/Basic Auth)
- Tenant configuration reviews during quarterly IT roadmap sessions
- Alignment to your organizations compliance and operational goal

## About Entech

Headquartered in Fort Myers, Florida, with additional locations in Bradenton, Sarasota and Naples, Entech has been a trusted managed services and technology solutions provider for over 27 years. The company specializes in delivering enterprise-level IT support, strategic technology consulting, cybersecurity, cloud solutions, and managed services tailored to small and medium-sized and large businesses across Southwest Florida. Entech is committed to removing technology hurdles so clients can focus on what matters most to their business success.
