

Fiber for Every Military Home: eCommunity™ Fiber Lights First Residential Customers at Fort Gordon

First Fort Gordon homes are active with eCommunity™ Fiber, providing military families with high-speed, future-proof internet for enhanced quality of life.

AUGUSTA, GA, UNITED STATES, August 27, 2025 /EINPresswire.com/ -- With the network now fully active, eCommunity™ Fiber is proud to announce that the first residential customers at Fort Gordon are connected to a new era of digital empowerment. This pivotal achievement underscores a technological transformation for military families, providing cutting-edge connectivity through state-of-the-art fiber-optic infrastructure. This major infrastructure upgrade is completed in partnership with Boldyn Networks, a leading neutral host and open access provider providing the fiber build for the project.

Fort Gordon Sign

The newly operational network delivers gigabit-plus internet speeds for streaming TV, telemedicine, and other low-latency products, setting a new standard for connectivity in military base housing.

This initiative, driven by eCommunity™ Fiber, directly responds to the expressed needs and survey feedback from military residents, which underscored the desire for more internet provider options. The newly operational network will provide residents with seamless access to online education, remote work, entertainment, and more, significantly improving their quality of life.

Elevating Military Base Connectivity

eCommunity™ Fiber's commitment to delivering secure, reliable, and high-speed internet access to military families is evident in this project. Key benefits include:

- Enhanced quality of life through superior internet connectivity.

By providing high-speed, resilient internet to homes across the installation, we're reinforcing Fort Gordon's commitment to Information Dominance, Quality of Life, and Service Excellence."

COL (R) Lou Zeisman, Military Liaison, Boldyn Networks

- Expanded access to online educational resources and communication tools.
- Improved operational efficiency and support for military personnel.
- A direct connection to the Internet Exchange, bypassing civilian traffic.

eCommunity™ Fiber is helping communities transition from the speed of sound to the speed of light. What that allows is multiple new broadband options to come to the base without being limited, so the base is now ready for the future. This reflects the project's goal to future-proof

the base's connectivity. This pivotal achievement marks the activation of high-speed fiber internet for the first residential customers at Fort Gordon, bringing cutting-edge connectivity directly to military homes.

"Boldyn's fiber deployment at Fort Gordon delivers more than connectivity—it directly supports the base's mission to enable readiness and transformation through cutting-edge infrastructure. By providing high-speed, resilient internet to homes across the installation, we're reinforcing Fort Gordon's commitment to Information Dominance, Quality of Life, and Service Excellence. This milestone enhances access to training portals, telehealth, and essential resources, while helping service members stay connected with loved ones—boosting morale, resilience, and operational effectiveness." -COL (R) Lou Zeisman, Military Liaison, Boldyn Networks

This achievement marks a significant step toward transforming military base connectivity and closing the digital divide for those who serve. The Fort Gordon community is now poised to enjoy the highest quality digital experiences, setting a model for future enhancements across military bases nationwide.

eCommunity is working with Boldyn Networks to convert two additional military bases by the end of this year and continue the effort through 2026.
