

Forward Edge-AI Launches Rapid Fiscal Year-End Procurement Pathways for Federal Buyers

Forward Edge-AI Unveils 24-Hour Contracting Paths for AI, Cyber, CBRN, and PQC Before FY-End

SAN ANTONIO, TX, UNITED STATES, September 10, 2025 /

EINPresswire.com/ -- With the September 30th fiscal year-end deadline rapidly approaching, Forward Edge-AI, Inc. announced today the immediate availability of accelerated contracting pathways to help Federal agencies obligate funds in under 24 hours—while meeting mission-critical requirements in Artificial Intelligence (AI), Automation & Transformation, [CBRN](#) Readiness, Cybersecurity, and Post-Quantum Cryptography ([PQC](#)).

Available to all federal agencies

Two Award Vehicles. One Mission: Speed + Compliance.

“

Our fastest award to date was completed in just six hours. We stand ready to deliver impact at mission speed.”

Eric Adolphe

Federal buyers now have two “easy button” options to secure Forward Edge-AI’s solutions before funds expire:

[Tradewinds](#) Solutions Marketplace (TSM):

Forward Edge-AI’s vetted solutions are awardable today through the Department of Defense’s Tradewinds Solutions Marketplace. This provides agencies with an acquisition-ready, compliant mechanism—avoiding lengthy

solicitations and enabling OTA/CSO awards in hours, not weeks.

Phase III SBIR Sole-Source Awards:

Through Forward Edge-AI’s Phase III authority, agencies can execute non-competed, sole-source awards without a Justification & Approval (J&A). With Forward Edge-AI’s AI-driven Contract Generation Tool and proven 8-step process, Phase III awards have been completed in as little as

one business day.

Transforming Federal Readiness at Speed. Forward Edge-AI's cutting-edge capabilities directly support national defense and homeland security priorities:

- Artificial Intelligence & Automation: Deploy mission-ready AI/ML and automation solutions that drive efficiency and transformation across agencies.
- CBRN Readiness: Enhance detection, response, and resilience against chemical, biological, radiological, and nuclear threats.
- Cybersecurity & PQC: Advance zero-trust architectures and accelerate post-quantum cryptography pilots to safeguard America's digital future.

"The clock is ticking for Federal buyers to obligate year-end funds. Forward Edge-AI eliminates the bottlenecks, offering rapid, compliant award pathways so agencies can field AI, cybersecurity, and mission-critical solutions before September 30," said Eric Adolphe, CEO of Forward Edge-AI.

About Forward Edge-AI, Inc.

Forward Edge-AI, Inc., is fast becoming a global leader in developing Artificial Intelligence-based technology to solve complex problems in support of public safety, national security, and defense. Core competencies include Business Transformation, Cybersecurity; and, Artificial Intelligence, Machine Learning, and Inference at the Competitive, Forward and Humanitarian Edge.
