

# METOS & Ukko Agro Partner To Give Growers & Agronomy Teams Faster Decisions, Clearer Spray Windows & Smarter Workflows.

*New METOS-Ukko partnership delivers predictive insights, clear spray windows & easy dashboards to help growers act faster and boost profits.*

TORONTO & WINNIPEG, ONTARIO & MANITOBA, CANADA, August 27, 2025 /EINPresswire.com/ -- METOS North America and [Ukko Agro Inc.](#) announced a new collaboration that helps farmers, agronomists, and ag retailers cut through digital complexity and make faster, more confident field decisions. By bringing together Ukko's predictive analytics and METOS' trusted in-field technology, the partnership delivers practical, ready-to-use tools that reduce risk, save time, and boost profitability.

With the new integrated platform, users can now:

- Get field-level risk alerts that flag when and where to scout.
- See spray-timing windows that factor in local weather and label requirements.
- Manage entire operations with clean dashboards designed for multi-farm retail networks.
- Access insights quickly through a mobile-first interface with desktop tools for deeper analysis.
- Export and integrate data easily into existing agronomy workflows via simple APIs

METOS 5 Weather Station in a sunflower field in late Summer

“Ukko Agro has always been about turning data into confident actions,” said Avi Bhargava, CEO of Ukko Agro. “This partnership means growers and agronomy teams can stop second-guessing and start making decisions faster, because the right insight is already waiting for them.”

“Growers are being asked to do more with less every season,” said Marty Cook, President of METOS North America. “By combining METOS’ field-proven hardware with Ukko’s predictive models, we’re simplifying the day-to-day, making it easier for farmers and agronomists to decide, act, and move on.”

The joint effort includes product development, sales, and marketing, with early access rolling out this fall. The tools are built specifically for independent agronomists, retailer agronomy teams, and progressive row-crop growers across the U.S. and Canada.
