

Thermahood TH095 M – New Fire-Rated Solution for Recessed Lights, Downlights & Speakers

UNITED KINGDOM, August 28, 2025 /EINPresswire.com/ -- Thermahood is proud to announce that its [TH095 M](#) — the robust metal variant of its popular downlight cover — can now be used to achieve 30- and 60-minute fire-rating.

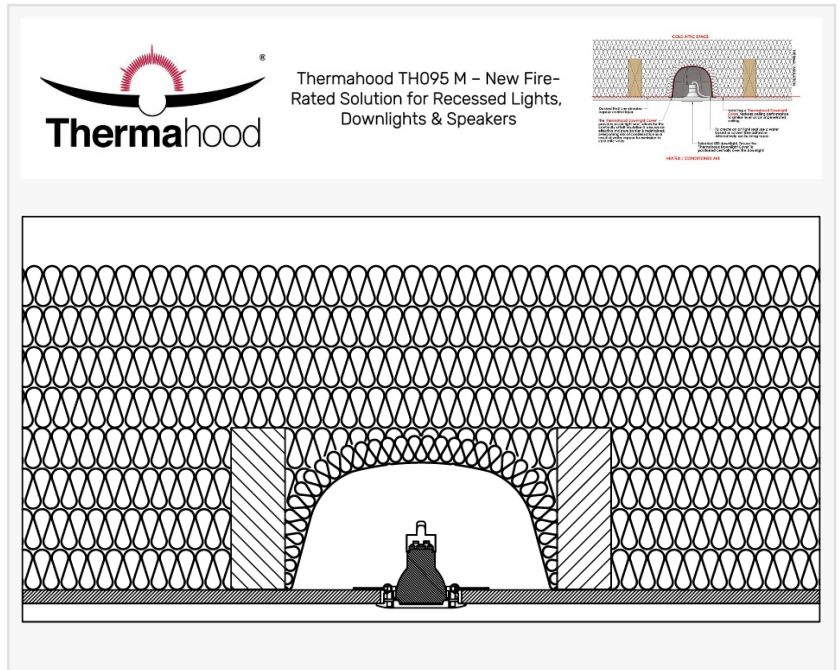

Designed for use with recessed downlights and ceiling speakers, the TH095 M provides a reliable solution for protecting fixtures while maintaining ceiling integrity and reducing air leakage.

When installed according to approved methods, the TH095 M can be used to achieve certified fire ratings, making it an ideal choice for developers, contractors, and self-builders who need to meet building control requirements without compromising on performance or efficiency.

In addition to supporting fire safety, the TH095 M enhances airtightness and energy efficiency, helping reduce heat loss and prevent cold draughts — key considerations in modern low-carbon construction and retrofit projects.

Key Benefits:

- Suitable for recessed downlights and ceiling speakers
- Supports improved airtightness and energy efficiency
- Reduces heat loss and draughts
- Strong, durable metal construction
- Helps meet Part L and Part B building regulations
- BS EN 1364-2
- EN 13501-2

-E30 (30min) and E60 (60min) fire rating

[About Thermahood](#)

Thermahood provides innovative, easy-to-install solutions that ensure airtightness, improve energy efficiency, and protect ceiling fittings. With the addition of fire-rated certification for the TH095 M, Thermahood continues to set the standard for safe and sustainable building products.
