Based on region, the market in North America was the largest in 2022, accounting for nearly two-fifths of the global supply chain management market. The demand for supply chain management is increasing in North America due to the technological infrastructure in the region combined with the high adoption of advanced technologies. Moreover, the market in Asia-Pacific is expected to dominate the market in terms of revenue and would cite the fastest CAGR of 14.2% from 2022 to 2032. The high adoption of advanced technologies will drive the market growth throughout the forecast timeframe.

Based on solution type, the procurement and sourcing segment grabbed the highest share of nearly one-third of the global supply chain management market in 2022. Procurement and sourcing are utilized in e-commerce, gaming, social media, and other applications to identify opportunities to optimize in order to realize specific business outcomes. On the other hand, the transportation management system segment is expected to dominate in terms of revenue during forecast period and is projected to cite the fastest CAGR of 14.8% from 2023 to 2032. It is used to identify the causes of behavior and develop strategies to modify behavior to improve the quality of life for individuals.

Based on industry vertical, the retail and consumer goods segment grabbed the highest share of more than one-fourth of the global supply chain management market in 2022 and is expected to dominate in terms of revenue during the forecast period. The growth is attributed to the rise in demand for automation in the supply chain process in the retail and consumer goods segment. However, the automotive segment is anticipated to showcase a noteworthy CAGR of 16.3% from 2022 to 2032. This is due to the rise in demand for security and lower operating costs by implementing a dependable SCM system.

Covid-19 Scenario

□ The COVID-19 pandemic outbreak had significant impact on the growth of the supply chain management market because of the growth in e-commerce during the pandemic, which encouraged supply chain management industry players to automate and digitalize processes to cater to the growing demand.

□ The increasing need for seamless product manufacturing, distribution, and delivery encouraged small and medium businesses to adopt efficient supply chain solutions during the COVID-19 pandemic, thereby driving the growth of the supply chain management market.

□ However, with a considerable control achieved over the pandemic, various sectors such as retail, manufacturing, and automotive, witnessed rising investments as supply chain management solutions grew in prominence across different business functions and offered several opportunities to digitize and expand the business across regions.

□ Moreover, various public and private entities are expected to come together to create ecosystems to share data for multiple use cases under a common regulatory and cybersecurity framework, which, in turn, is expected to provide lucrative opportunity for the growth of the SCM market.
